The Duck family is a fictional family of cartoon ducks related to Disney character Donald Duck. The family is also related to the Coot, Goose, and Gander families, as well as the Scottish Clan McDuck. Besides Donald, the best-known members of the Duck family are Huey, Dewey, and Louie, Donald's triplet nephews.

Members of the Duck family appear most extensively in Donald Duck comics (although some have made animated appearances). In 1993, American comics author Don Rosa published a Duck Family Tree that established the characters' relationships in his stories. He also created a fictional timeline for when certain characters were born (All birth/death dates given below are Rosa's). Other comics authors both before and after have shown variations in the family.

Duck Hunt is a 1984 light gun shooter video game developed and published by Nintendo for the Nintendo Entertainment System (NES). The game was first released in April 1984 in Japan for the Family Computer (Famicom) console and in North America as an arcade game for the Nintendo VS. System. It became a launch game for the NES in North America in October 1985, and was re-released in Europe two years later. Players fire the NES Zapper at a CRT television, with three attempts per round to shoot ducks and clay pigeons.

The game initially received a positive reception in the mid-1980s, but was later given mild praise in retrospective reviews. The game was inspired by Nintendo's previous electro-mechanical arcade game which was based on the Laser Clay Shooting System released in 1976. Upon release...

Nanjing salted duck (simplified Chinese: 盐水鸭; traditional Chinese: 鹽水鴨; pinyin: yánsuǒ yā) is a local duck dish from Nanjing, China. The history of the dish goes back hundreds of years, possibly to the 14th century, but it grew more famous during the Qing Dynasty. The tender white duck-meat has some fat but is not greasy, and in presentation the dish is fragrant and often crispy. Although available all year round, experts believe that duck in autumn inherently possesses a sweet scent of osmanthus and is therefore best in this season. In line with this statement, some cooked-meat product shops have started experimenting with the use of osmanthus to flavour duck. Nanjing salted duck prepared shortly before or after mid-Autumn is reputed to taste the best, because of duck production during the...

A duck call may be either the sound-imitation process used in waterfowl hunting, by which a hunter lures waterfowl, or the actual tool which the person uses to do so. Early duck call tools were basic woodwind instruments, while later innovations are constructed of rubber and plastic, and allow the hunter to adjust the volume and tone of the calls with reeds. Today's duck calls usually fall into three main categories: single, double, or triple reed call with many variations, although the triple reed is rare. The goal of a duck call is to sound like a realistic live duck, in attempts to decoy, or fool a duck into believing the decoys that are seen by a duck, and the sound that is heard appears lifelike.

Duck Dodgers is the star of a series of cartoons produced by Warner Bros., featuring Daffy Duck in the role of a science fiction hero.

He first appeared in the 1953 cartoon short Duck Dodgers in the 24½th Century, directed by Chuck Jones as a spoof of the popular Buck Rogers in the 25th Century and Flash Gordon science fiction serials of the 1930s, casting the brash, egomaniacal Daffy Duck as the hero of the story. The plot of the cartoon involves Duck Dodgers' search for the rare element Illudium Phosdex, "the shaving cream atom", the only remaining supply of which is on the mysterious "Planet X". Just after Dodgers has claimed Planet X in the name of the Earth, Marvin the Martian lands on the same planet and claims it in the name of Mars. The stage is set for a battle of wits, not to mention...

Duck is the common name for numerous species of waterfowl in the family Anatidae. Ducks are generally smaller and shorter-necked than swans and geese, which are members of the same family. Divided among several subfamilies, they are a form taxon; they do not represent a monophyletic group (the group of all descendants of a single common ancestral species), since swans and geese are not considered ducks. Ducks are mostly aquatic birds, and may be found in both fresh water and sea water.

Ducks are sometimes confused with several types of unrelated water birds with similar forms, such as loons or divers, grebes, gallinules and coots.
