

Dogger

Dogger

dogger in Wiktionary, the free dictionary. Dogger may refer to: Dogger Bank, a large shallow area in the North Sea between Britain and Denmark Dogger

Dogger may refer to:

Dogger Bank

developed as Dogger Bank Wind Farm. The name Dogger Bank was first recorded in the mid-17th century. It is probably derived from the word "dogger"; used for

Dogger Bank (Dutch: Doggersbank, German: Doggerbank, Danish: Doggerbanke) is a large sandbank in a shallow area of the North Sea about 100 kilometres (55 nautical miles) off the east coast of England.

During the last ice age, the bank was part of a large landmass connecting mainland Europe and the British Isles, now known as Doggerland. It has long been known by fishermen to be a productive fishing bank; it was named after the doggers, medieval Dutch fishing boats especially used for catching cod.

At the beginning of the 21st century, the area was identified as a potential site for a UK round 3 wind farm, being developed as Dogger Bank Wind Farm.

Dogger Bank Wind Farm

be installed on Dogger Bank. Since 2017 Creyke Beck A and B and Teesside A are developed by Dogger Bank Wind Farm Limited as Dogger Bank A, B and C,

Dogger Bank Wind Farm is a group of offshore wind farms under construction 130 to 200 kilometres (81 to 124 mi) off the east coast of Yorkshire, England in the North Sea. It is considered to be the world's largest offshore windfarm.

It was developed by the Forewind consortium, with three phases envisioned - first phase (Creyke Beck A and B), second phase (Teesside A and B) and third phase (Teesside C and D). In 2015, the third phase was abandoned, while the first and second phases were granted consent. It was initially expected that the Dogger Bank development will consist of four offshore wind farms, each with a capacity of up to 1.2 GW, creating a combined capacity of 4.8 GW. As of 2024, a total of 8.1 GW generating capacity is expected to be installed on Dogger Bank.

Since 2017 Creyke Beck...

Dogger Bank incident

The Dogger Bank incident (also known as the North Sea Incident, the Russian Outrage or the Incident of Hull) occurred on the night of 21/22 October 1904

The Dogger Bank incident (also known as the North Sea Incident, the Russian Outrage or the Incident of Hull) occurred on the night of 21/22 October 1904, during the Russo-Japanese War, when the Baltic Fleet of the Imperial Russian Navy mistook civilian British fishing trawlers from Kingston upon Hull in the Dogger Bank area of the North Sea for Imperial Japanese Navy torpedo boats and fired on them, also firing on each other in the chaos of the *melée*.

Two British fishermen died, six more were injured, one fishing vessel was sunk, and five more boats were damaged. On the Russian side, one sailor and a Russian Orthodox priest aboard the cruiser Aurora were killed by friendly fire. The incident almost led to war between the United Kingdom and the Russian Empire. An international commission of...

The Dogger Bank earthquake of 1931 is the strongest earthquake recorded in the United Kingdom since measurements began. It had a magnitude of 6.1 on the Richter scale, and it caused a shaking intensity of VI (Strong) to VII (Very strong) on the Mercalli intensity scale. The location of the earthquake in the North Sea meant that damage was significantly less than it would have been had the epicentre been on the British mainland.

Dogger (boat)

North Sea, and the word dogger was given to the rich fishing grounds where they often fished, which became known as the Dogger Bank. The sea area in turn

The dogger (Dutch pronunciation: [dʰʊr]) was a group of similar fishing boats, described as early as the fourteenth century, that commonly operated in the North Sea. Early examples were single-masted and were largely used for fishing for cod by rod and line. By the seventeenth century, two-masted doggers were common and were using trawl nets.

Doggers were slow but sturdy vessels, capable of fishing in the rough conditions of the North Sea.

A dog breed is a particular type of dog that was purposefully bred by humans to perform specific tasks, such as herding, hunting, and guarding. Dogs are the most variable mammal on Earth, with artificial selection producing upward of 360 globally recognized breeds. These breeds possess distinct traits related to morphology, which include body size and shape, tail phenotype, fur type, etc., but are only one species of dog. Their behavioral traits include guarding, herding, and hunting, and personality traits such as hyper-social behavior, boldness, and aggression. Most breeds were derived from small numbers of founders within the last 200 years. As a result of their adaptability to many environments and breedability for human needs, today dogs are the most abundant carnivore species and are...

Sled dog

A sled dog is a dog trained and used to pull a land vehicle in harness, most commonly a sled over snow.

Sled dogs have been used in the Arctic for at least 8,000 years and, along with watercraft, were the only transportation in Arctic areas until the introduction of semi-trailer trucks, snowmobiles and airplanes in the 20th century, hauling supplies in areas that were inaccessible by other methods. They were used with varying success in the explorations of both poles, as well as during the Alaskan gold rush. Sled dog teams delivered mail to rural communities in Alaska, Yukon, Northwest Territories and Nunavut. Sled dogs today are still used by some rural communities, especially in areas of Russia, Canada, and Alaska as well as much of Greenland. They are used for recreational purposes and racing...
