The Toyota C-HR (Japanese: ??? C-HR, Hepburn: Toyota Sh?eichi?ru) is a subcompact crossover SUV manufactured and marketed by Japanese automaker Toyota since 2016. Since 2020, it is positioned between the Yaris Cross and Corolla Cross in Toyota's crossover SUV range.

The first-generation C-HR was available in many regions, including Japan, China, North America, Europe, Southeast Asia, and Australasia, and was produced in four countries. Since the release of the second-generation C-HR in 2023, availability of the C-HR has been limited to Europe and Australia, with production centralised in Turkey. The Corolla Cross, released in 2020, has largely taken over the model's positioning outside Europe.

HR 5171, also known as V766 Centauri, is a yellow hypergiant in the constellation Centaurus. It is said to be either an extreme red supergiant (RSG) or recent post-red supergiant (Post-RSG) yellow hypergiant (YHG), both of which suggest it is one of the largest known stars. The star's diameter is uncertain but likely to be between 1,100 and 1,600 times that of the Sun. It is 3.6 kpc (11,700 light years) from Earth. It is a variable star, and when it is near its maximum brightness, magnitude 6.1, it is faintly visible to the naked eye under excellent observing conditions.

A 2014 publication hypothesized the star to be a contact binary, sharing a common envelope of material with a smaller yellow supergiant and secondary star, the two orbiting each other every 1,304±6 d. A recent publication...

The Honda HR-V is a subcompact crossover SUV (B-segment) manufactured and marketed by Honda over three generations.

The first generation HR-V, based on the Honda Logo, was marketed from 1999 to 2006 in Europe, Japan and select Asia-Pacific markets, in either three-door (1999–2003) or five-door (1999–2006) configurations — internally designated GH2 and GH4 respectively.

After a seven-year hiatus, Honda reintroduced the nameplate for the second generation HR-V, based on the third-generation Honda Fit. Production began in late 2013 for the Japanese domestic market as the Honda Vezel (Japanese: ????????, Hepburn: Honda Vezeru), while production started in 2015 for North America, Australia, Brazil and select Asian markets as the HR-V. Apart from Japan, the model is also sold as the Vezel in China...

The HR Top 100 is the main Croatian domestic singles airplay chart, issued weekly by the Croatian Music Institute (Institut Hrvatske Glazbe) and the Croatian Phonographic Association (Hrvatska Diskografska Udruga) through Top lista. The charts are a record of the most played domestic songs in various genres in Croatia. Formerly known as the HR Top 40, it became the official Croatian airplay chart in December 2012. As of 13 January 2025, the chart was expanded to include 100 entries and has been titled the HR Top 100 since then.

HR Carinae is a luminous blue variable star located in the constellation Carina. It is surrounded by a vast nebula of ejected nuclear-processed material because this star has a multiple shell expanding atmosphere. This star is among the most luminous stars in the Milky Way. It has very broad emission wings on the Balmer lines, reminiscent from the broad lines observed in the spectra of O and Wolf–Rayet stars. A distance of 5 kpc and a bolometric magnitude of −9.4 put HR Car among the most luminous stars of the galaxy.

HR 2562 B is a substellar companion orbiting the star HR 2562. Discovered in 2016 by a team led by Quinn M. Konopacky by direct imaging, HR 2562 B orbits within the inner edge of HR 2562's circumstellar disc—as of April 2023, it is one of only two known brown dwarfs to do so. Separated by roughly 20 astronomical units ( $3.0 \times 10^9$  km) from its primary companion, HR 2562 B has drawn interest for its potential dynamical interactions with the outer circumstellar disc.
