

Mac App

Mac App Store

The Mac App Store (also known as the App Store) is a digital distribution platform for macOS apps, often referred to as Mac apps, created and maintained

The Mac App Store (also known as the App Store) is a digital distribution platform for macOS apps, often referred to as Mac apps, created and maintained by Apple. The platform was announced on October 20, 2010, at Apple's "Back to the Mac" event. Apple began accepting app submissions from registered developers on November 3, 2010, in preparation for its launch.

The Mac App Store was launched on January 6, 2011, as part of the free Mac OS X 10.6.6 update for all current Snow Leopard users. After 24 hours of release, Apple announced that there were over one million downloads.

List of built-in macOS apps

This is a list of built-in apps and system components developed by Apple Inc. for macOS that come bundled by default or are installed through a system

This is a list of built-in apps and system components developed by Apple Inc. for macOS that come bundled by default or are installed through a system update. Many of the default programs found on macOS have counterparts on Apple's other operating systems, most often on iOS and iPadOS.

Apple has also included versions of iWork, iMovie, and GarageBand for free with new device activations since 2013. However, these programs are maintained independently from the operating system itself. Similarly, Xcode is offered for free on the Mac App Store and receives updates independently of the operating system despite being tightly integrated.

Apple Mail

emails until the release of iOS 9. EAS is not supported in the macOS version of Apple's Mail app, the main issue being that sent messages will incorrectly

Mail, also known as Apple Mail, is an email client included by Apple Inc. with its operating systems macOS, iOS, iPadOS, watchOS, and visionOS. Mail grew out of NeXTMail, which was originally developed by NeXT as part of its NeXTSTEP operating system, after Apple's acquisition of NeXT in 1997.

The current version of Mail utilizes SMTP for message sending, POP3, Exchange and IMAP for message retrieval and S/MIME for end-to-end message encryption. It is also preconfigured to work with popular email providers, such as Yahoo! Mail, AOL Mail, Gmail, Outlook and iCloud (formerly MobileMe) and it supports Exchange. iOS features a mobile version of Mail with added Exchange ActiveSync (EAS) support, though it notoriously missed the functionality of attaching files to reply emails until the release of...

Mac OS X Server

Server app marketed as OS X Server (and later macOS Server), which was sold through the Mac App Store. The Server app lacked many features from Mac OS X

Mac OS X Server is a series of discontinued Unix-like server operating systems developed by Apple Inc., based on macOS. It provided server functionality and system administration tools, and tools to manage both

macOS-based computers and iOS-based devices, network services such as a mail transfer agent, AFP and SMB servers, an LDAP server, and a domain name server, as well as server applications including a Web server, database, and calendar server.

Starting with OS X Lion, Apple stopped selling a standalone server operating system, instead releasing an add-on Server app marketed as OS X Server (and later macOS Server), which was sold through the Mac App Store. The Server app lacked many features from Mac OS X Server, and later versions of the app only included functionality related to user...

MacOS Mojave

succeeded macOS High Sierra and was followed by macOS Catalina. macOS Mojave is the last version of macOS that features the iTunes and Dashboard apps. macOS Mojave

macOS Mojave (mo-HAH-vee; version 10.14) is the fifteenth major release of macOS, Apple Inc.'s desktop operating system for Macintosh computers. macOS Mojave was announced at Apple's Worldwide Developers Conference on June 4, 2018, and was released to the public on September 24. The operating system's name refers to the Mojave Desert, continuing the use of California-themed names that began with OS X Mavericks. It succeeded macOS High Sierra and was followed by macOS Catalina. macOS Mojave is the last version of macOS that features the iTunes and Dashboard apps.

macOS Mojave brings several iOS apps to the desktop operating system, including Apple News, Voice Memos, and Home. It also includes a more comprehensive "dark mode", is the final version of macOS to support 32-bit application software...

App Store (Apple)

for example, then-named Google Apps. Apple announced Mac App Store, a similar app distribution platform for its macOS personal computer operating system

The App Store is an app marketplace developed and maintained by Apple, for mobile apps on its iOS and iPadOS operating systems. The store allows users to browse and download approved apps developed within Apple's iOS SDK. Apps can be downloaded on the iPhone, iPod Touch, or iPad, and some can be transferred to the Apple Watch smartwatch or 4th-generation or newer Apple TVs as extensions of iPhone apps.

The App Store opened on July 10, 2008, with an initial 500 applications available. The number of apps peaked at around 2.2 million in 2017, but declined slightly over the next few years as Apple began a process to remove old or 32-bit apps. As of 2021, the store features more than 1.8 million apps.

While Apple touts the role of the App Store in creating new jobs in the "app economy" and claims...

Photos (Apple)

Photos App“; *Lifehacker*. Archived from the original on August 9, 2016. Retrieved April 9, 2015. Simmons, Dan (April 8, 2015). “Apple releases Mac app to store

Photos is a photo management and editing application developed by Apple. It was released as a bundled app in iPhone OS 1, and released as a bundled app to OS X Yosemite users in the 10.10.3 update on April 8, 2015, replacing iPhoto and Aperture. It was released for tvOS 10 on September 13, 2016. With the introduction of the Apple Vision Pro on the WWDC 2023 on June 5, 2023 the Photos app came to visionOS.

MacOS Sierra

2016, as a free upgrade through the Mac App Store and it was succeeded by macOS High Sierra on September 25, 2017. macOS Sierra requires at least 2 GB of

macOS Sierra (version 10.12) is the thirteenth major release of macOS (formerly known as OS X and Mac OS X), Apple Inc.'s desktop and server operating system for Macintosh computers. The name "macOS" stems from the intention to unify the operating system's name with that of iOS, watchOS and tvOS. Sierra is named after the Sierra Nevada mountain range in California and Nevada. Specifically, Lone Pine Peak is the location for macOS Sierra's default wallpaper. Its major new features concern Continuity, iCloud, and windowing, as well as support for Apple Pay and Siri.

The first beta of macOS Sierra was released to developers shortly following the 2016 WWDC keynote on June 13, 2016. The first public-beta release followed on July 7, 2016. It was released to end users on September 20, 2016, as a free...

Pages (word processor)

How To: Edit Mac OS .pages documents in Linux". "Mac App Store

Pages". iTunes. Archived from the original on April 26, 2012. "Mac App Store - Pages". - Pages is a word processing program developed by Apple Inc. that is part of the iWork productivity suite. It runs on the macOS, iPadOS, and iOS operating systems and is also available on the iCloud website. The first version of Pages was released in February 2005. Pages is marketed by Apple as an easy-to-use application that allows users to quickly create documents on their devices. Many Apple-designed templates comprising different themes (such as letters, résumés, posters, and outlines) are included with Pages.

MacOS

Mac App Store, a marketplace of software maintained by Apple through a process requiring the company's approval. Apps installed through the Mac App Store

macOS (previously OS X and originally Mac OS X) is a proprietary Unix-like operating system, derived from OPENSTEP for Mach and FreeBSD, which has been marketed and developed by Apple Inc. since 2001. It is the current operating system for Apple's Mac computers. Within the market of desktop and laptop computers, it is the second most widely used desktop OS, after Microsoft Windows and ahead of all Linux distributions, including ChromeOS and SteamOS. As of 2024, the most recent release of macOS is macOS 15 Sequoia, the 21st major version of macOS.

Mac OS X succeeded the classic Mac OS, the primary Macintosh operating system from 1984 to 2001. Its underlying architecture came from NeXT's NeXTSTEP, as a result of Apple's acquisition of NeXT, which also brought Steve Jobs back to Apple. The first...
