

# Architect

## Architect

*An architect is a person who plans, designs, and oversees the construction of buildings. To practice architecture means to provide services in connection*

An architect is a person who plans, designs, and oversees the construction of buildings. To practice architecture means to provide services in connection with the design of buildings and the space within the site surrounding the buildings that have human occupancy or use as their principal purpose. Etymologically, the term architect derives from the Latin architectus, which derives from the Greek (arkhi-, chief + tekton, builder), i.e., chief builder.

The professional requirements for architects vary from location to location. An architect's decisions affect public safety, and thus the architect must undergo specialised training consisting of advanced education and a practicum (or internship) for practical experience to earn a license to practice architecture. Practical, technical, and academic...

## Architect of the Capitol

*The Architect of the Capitol is the federal agency responsible for the maintenance, operation, development, and preservation of the United States Capitol*

The Architect of the Capitol is the federal agency responsible for the maintenance, operation, development, and preservation of the United States Capitol Complex. It is an agency of the legislative branch of the federal government and is accountable to the United States Congress and the Supreme Court. Both the agency and the head of the agency are called "Architect of the Capitol". The head of the agency is appointed by a vote of a congressional commission for a ten-year term. Prior to 2024, the president of the United States appointed the architect upon confirmation vote by the United States Senate, and was accountable to the president.

## Systems architect

*The systems architect is an information and communications technology professional. Systems architects define the architecture of a computerized system*

The systems architect is an information and communications technology professional. Systems architects define the architecture of a computerized system (i.e., a system composed of software and hardware) in order to fulfill certain requirements. Such definitions include: a breakdown of the system into components, the component interactions and interfaces (including with the environment, especially the user), and the technologies and resources to be used in its design and implementation.

The systems architect's work should seek to avoid implementation issues and readily permit unanticipated extensions/modifications in future stages. Because of the extensive experience required for this, the systems architect is typically a very senior technologist with substantial, but general, knowledge of hardware...

## Landscape architect

*A landscape architect is a person who is educated in the field of landscape architecture. The practice of landscape architecture includes: site analysis*

A landscape architect is a person who is educated in the field of landscape architecture. The practice of landscape architecture includes: site analysis, site inventory, site planning, land planning, planting design,

grading, storm water management, sustainable design, construction specification, and ensuring that all plans meet the current building codes and local and federal ordinances.

The practice of landscape architecture dates to some of the earliest of human cultures and just as much as the practice of medicine has been inimical to the species and ubiquitous worldwide for several millennia. However, this article examines the modern profession and educational discipline of those practicing the design of landscape architecture.

In the 1700s, Humphry Repton described his occupation as...

#### Great Architect of the Universe

*The Great Architect of the Universe (also Grand Architect of the Universe or Supreme Architect of the Universe) is a conception of God discussed by many*

The Great Architect of the Universe (also Grand Architect of the Universe or Supreme Architect of the Universe) is a conception of God discussed by many Christian theologians and apologists. As a designation it is used within Freemasonry to represent the deity neutrally (in whatever form, and by whatever name each member may individually believe in). It is also a Rosicrucian conception of God, as expressed by Max Heindel.

#### System Architect

*Unicom System Architect is an enterprise architecture tool that is used by the business and technology departments of corporations and government agencies*

Unicom System Architect is an enterprise architecture tool that is used by the business and technology departments of corporations and government agencies to model their business operations and the systems, applications, and databases that support them. System Architect is used to build architectures using various frameworks including TOGAF, ArchiMate, DoDAF, MODAF, NAF and standard method notations such as sysML, UML, BPMN, and relational data modeling. System Architect is developed by UNICOM Systems, a division of UNICOM Global, a United States-based company.

#### Office of the Supervising Architect for the U.S. Treasury

*The Office of the Supervising Architect was an agency of the United States Treasury Department that designed federal government buildings from 1852 to*

The Office of the Supervising Architect was an agency of the United States Treasury Department that designed federal government buildings from 1852 to 1939.
