On 29 April 1978, the final match day of the 1977–78 Fußball-Bundesliga season, Borussia Mönchengladbach played Borussia Dortmund with the possibility of winning the Bundesliga championship. Knowing that if 1. FC Köln won their game away to FC St. Pauli, Borussia Mönchengladbach would have to win by a margin well in excess of ten goals. The match finished 12–0, which remains the largest margin of victory and tied with four other matches for the biggest win in Bundesliga history. However, 1. FC Köln beat FC St. Pauli 5–0 to become champions.

0 (zero) is a number representing an empty quantity. Adding (or subtracting) 0 to any number leaves that number unchanged; in mathematical terminology, 0 is the additive identity of the integers, rational numbers, real numbers, and complex numbers, as well as other algebraic structures. Multiplying any number by 0 results in 0, and consequently division by zero has no meaning in arithmetic.

As a numerical digit, 0 plays a crucial role in decimal notation: it indicates that the power of ten corresponding to the place containing a 0 does not contribute to the total. For example, "205" in decimal means two hundreds, no tens, and five ones. The same principle applies in place-value notations that uses a base other than ten, such as binary and hexadecimal. The modern use of 0 in this manner derives...

Under the Whyte notation for the classification of steam locomotives, 0-4-0 represents one of the simplest possible types, that with two axles and four coupled wheels, all of which are driven. The wheels on the earliest four-coupled locomotives were connected by a single gear wheel, but from 1825 the wheels were usually connected with coupling rods to form a single driven set.

The notation 0-4-0T indicates a tank locomotive of this wheel arrangement on which its water and fuel is carried on board the engine itself, rather than in an attached tender.

In Britain, the Whyte notation of wheel arrangement was also often used for the classification of electric and diesel-electric locomotives with side-rod-coupled driving wheels.

Under the UIC classification used in Europe and, in more recent years...

0:12 Revolution in Just Listening is the third studio album to be released by American metalcore band Coalesce, which was released on November 16, 1999, through Relapse Records. The album was recorded and released posthumously, as the group broke up prior after touring troubles and made the album as they were obliged to do so by contract. Hydra Head Records issued the vinyl edition of the album, and in 2008 Relapse released a remastered version of the album under the title 012:2. The album was included in Decibel Magazines "Hall of Fame" in 2008.

The South African Railways Class KM 0-6-0+0-6-0 of 1904 was an articulated steam locomotive from the pre-Union era in Transvaal Colony.

In 1904, the Central South African Railways placed a single 0-6-0+0-6-0T Kitson-Meyer type articulated steam locomotive in service and designated it Class M. In 1912, when the locomotive was assimilated into the South African Railways, it was renumbered and designated Class KM.

0.999...

Denote by $0.(9)_n$ the number $0.999\dots 9$, with n $\{\displaystyle n\}$ nines after the decimal point. Thus $0.(9)_1 = 0.9$, $0.(9)_2 = 0.99$, $0.(9)_3 = 0.999$, and so

In mathematics, 0.999... is a repeating decimal that is an alternative way of writing the number 1. The three dots represent an unending list of "9" digits. Following the standard rules for representing real numbers in decimal notation, its value is the smallest number greater than every number in the increasing sequence 0.9, 0.99, 0.999, and so on. It can be proved that this number is 1; that is,

0.999

$\{ \displaystyle 0.999 \ldots = 1. \}$

Despite common misconceptions, 0.999... is not "almost exactly 1" or "very, very nearly but not quite 1"; rather, "0.999..." and "1" represent exactly the same number.

There are many ways of showing this equality, from intuitive arguments to mathematically rigorous proofs. The intuitive...

The United States Navy Mk 12 MOD 0/1/H Special Purpose Rifle (SPR) is a designated marksman rifle that was in service with United States Special Operations Forces in the designated marksman role until 2017, also designed to be shorter than standard weapons. SPR initially stood for Special Purpose Receiver as it referred to an add-on upper receiver assembly (part of the proposed SOPMOD upgrades), but that nomenclature changed to Special Purpose Rifle as the weapon became a stand-alone weapons system.

The SPR was eventually type-classified by the U.S. Navy as the Mk 12. The weapon was developed by the Naval Surface Warfare Center Crane Division for US military special operations units.

The rifle is designed to fire semi-automatically, although it has the option to fire in full auto in case of...
