Goodloe Harper Bell (April 7, 1832 – January 17, 1899), born to David and Lucy Bell, was the first teacher at the first Seventh-day Adventist school and co-founder of the Seventh-day Adventist school system. This first school was located on the first floor of the old Review and Herald building in Battle Creek, Michigan. Bell and his family lived on the second floor.

An original portrait of G. H. Bell resides at the Andrews University Museum. It was donated by Dr. Lavan C. and Junette Mapes.

Some of his early students include Edson and Willie White, sons of James and Ellen G. White. Ellen White was a great supporter and influence to G. H. Bell. Others included in the roster of his early students are two notable brothers, William K. Kellogg and John Harvey Kellogg.

The Bell 47 is a single-rotor single-engine light helicopter manufactured by Bell Helicopter. It was based on the third Bell 30 prototype, which was the company's first helicopter designed by Arthur M. Young. The 47 became the first helicopter certified for civilian use on 8 March 1946. The first civilian delivery was made on 31 December 1946 to Helicopter Air Transport. More than 5,600 Bell 47s were produced, including those under license by Agusta in Italy, Kawasaki Heavy Industries in Japan, and Westland Aircraft in the United Kingdom. The Bell 47J Ranger is a modified version with a fully enclosed cabin and tail boom.

The IEEE Alexander Graham Bell Medal is an award honoring "exceptional contributions to communications and networking sciences and engineering" in the field of telecommunications. The medal is one of the highest honors awarded by the Institute of Electrical and Electronics Engineers (IEEE) for achievements in telecommunication sciences and engineering.

It was instituted in 1976 by the directors of IEEE, commemorating the centennial of the invention of the telephone by Alexander Graham Bell. The award is presented either to an individual, or to a team of two or three persons.

The institute's reasoning for the award was described thus:

The invention of the telephone by Alexander Graham Bell in 1876 was a major event in electrotechnology. It was instrumental in stimulating the broad telecommunications...

Alexander Graham Bell

Alexander Graham Bell (/ˈreɪ.ˈm/ ; born Alexander Bell; March 3, 1847 – August 2, 1922) was a Scottish-born Canadian-American inventor, scientist, and

Alexander Graham Bell (; born Alexander Bell; March 3, 1847 – August 2, 1922) was a Scottish-born Canadian-American inventor, scientist, and engineer who is credited with patenting the first practical telephone. He also co-founded the American Telephone and Telegraph Company (AT&T) in 1885.

Bell's father, grandfather, and brother had all been associated with work on elocution and speech, and both his mother and wife were deaf, profoundly influencing Bell's life's work. His research on hearing and speech further led him to experiment with hearing devices, which eventually culminated in his being awarded the first U.S. patent for the telephone, on March 7, 1876. Bell considered his invention an intrusion on his real work as a scientist and refused to have a telephone in his study.

Many other...

George Maxwell Bell (October 13, 1911 – July 19, 1972) was a Canadian newspaper publisher, race horse owner and philanthropist. He was best known as the co-founder of FP Publications, Canada's largest newspaper syndicate in the 1960s. He built his newspaper empire after inheriting the Calgary Albertan, and its \$500,000 debt, from his father in 1936. He repaid the debt by 1945 and proceeded to purchase papers across the country, including the Ottawa Journal and The Globe and Mail. Much of Bell's fortune was built on Alberta's burgeoning oil and gas industry. He formed several companies in the late 1940s which came to be worth millions of dollars when sold.

Bell was a long time owner of thoroughbred race horses. He partnered with Frank McMahon to form two stables that won races across Canada...

Norris Garrett Bell

Norris Garrett Bell CMG (1860 – 12 January 1937), sometimes referred to as Col. N. G. Bell, was a Scottish-born railway engineer in Australia. He was

Norris Garrett Bell (1860 – 12 January 1937), sometimes referred to as Col. N. G. Bell, was a Scottish-born railway engineer in Australia. He was employed as the Commissioner of Railways from 1917 to 1929 and played a significant role all aspects of constructing the Oodnadatta to Alice Springs railway link, "The Ghan".

John Bell

John Bell may refer to: John Zephaniah Bell (1794–1883), Scottish artist John Bell (sculptor) (1812–1895), British sculptor John Hyslop Bell (1833–1920)

John Bell may refer to:

Mabel Gardiner Hubbard

Mabel Gardiner Hubbard Bell (November 25, 1857 – January 3, 1923) was an American businesswoman, and the daughter of Boston lawyer Gardiner Green Hubbard

Mabel Gardiner Hubbard Bell (November 25, 1857 – January 3, 1923) was an American businesswoman, and the daughter of Boston lawyer Gardiner Green Hubbard. She was the wife of Alexander Graham Bell, inventor of the first practical telephone.

From the time of Mabel's courtship with Graham Bell in 1873, until his death in 1922, Mabel became and remained the most significant influence in his life. Folklore held that Bell undertook telecommunication experiments in an attempt to restore her hearing which had been destroyed by disease close to her fifth birthday, leaving her completely deaf for the remainder of her life.
