As far back as the 1970s, international fast food restaurant chain Burger King has attempted to introduce a premium line of burgers. These sandwiches are part of a system which eventually became known as the barbell strategy; a plan designed to expand Burger King's menu with both more sophisticated, adult-oriented fare along with products that are more value-oriented. This program is intended to bring in a larger, more affluent adult audience who will be willing to spend more on the better quality products on one side while maintaining a lower cost value menu dedicated to a more cost-conscious audience on the other. The hope is that the customers would be drawn in initially for the lower prices of the value-menu and upgrade to the more expensive products, upping overall sales.

A veggie burger or meatless burger is a hamburger made with a patty that does not contain meat, or the patty of such a hamburger. The patty may be made from ingredients like beans (especially soybeans and tofu), nuts, grains, seeds, or fungi such as mushrooms or mycoprotein.

The essence of the veggie burger patty has existed in various Eurasian cuisines for millennia, including in the form of grilled or fried meatless discs, or as koftas, a commonplace item in Indian cuisine. These may be made of entirely vegetarian ingredients such as legumes or other plant-derived proteins.
