Dinosaurs are a diverse group of reptiles of the clade Dinosauria. They first appeared during the Triassic period, between 243 and 233.23 million years ago (mya), although the exact origin and timing of the evolution of dinosaurs is a subject of active research. They became the dominant terrestrial vertebrates after the Triassic–Jurassic extinction event 201.3 mya and their dominance continued throughout the Jurassic and Cretaceous periods. The fossil record shows that birds are feathered dinosaurs, having evolved from earlier theropods during the Late Jurassic epoch, and are the only dinosaur lineage known to have survived the Cretaceous–Paleogene extinction event approximately 66 mya. Dinosaurs can therefore be divided into avian dinosaurs—birds—and the extinct non-avian dinosaurs, which...

Gertie the Dinosaur is an animated short film released in 1914 by American cartoonist and animator Winsor McCay. It is the first animated film to feature a dinosaur. McCay initially presented the film before live audiences as an interactive part of his vaudeville act; the frisky, childlike Gertie performed tricks at her master's command. McCay's employer William Randolph Hearst curtailed his vaudeville activities, prompting McCay to add a live-action introductory sequence to the film for its theatrical release, which was renamed Winsor McCay, the Famous Cartoonist, and Gertie. McCay abandoned a sequel, Gertie on Tour (c. 1921), after producing about a minute of footage.

Although Gertie is popularly thought to be the earliest animated film, McCay had previously made Little Nemo (1911) and How...
