

Underestimated

Cost overrun

costs are in excess of budgeted amounts due to a value engineering underestimation of the actual cost during budgeting, they are known by these terms

A cost overrun, also known as a cost increase or budget overrun, involves unexpected incurred costs. When these costs are in excess of budgeted amounts due to a value engineering underestimation of the actual cost during budgeting, they are known by these terms.

Cost overruns are common in infrastructure, building, and technology projects. For IT projects, a 2004 industry study by the Standish Group found an average cost overrun of 43 percent; 71 percent of projects came in over budget, exceeded time estimates, and had estimated too narrow a scope; and total waste was estimated at \$55 billion per year in the US alone. Other studies concluded that costs for IT projects are overrun by an average of 33 to 34 percent.

Many major construction projects have incurred cost overruns; cost estimates...

Underestimated (song)

Best Kept Secret. "Underestimated" reached #26 in Netherlands. The remix of Peter Ries isn't included in the album. Underestimated (Peter Ries Radio Remix)

Don't Underestimate My Love for You

"Don't Underestimate My Love for You" is a song written by Dave Loggins, Steve Dorff and Steve Diamond, and recorded by American country music artist

"Don't Underestimate My Love for You" is a song written by Dave Loggins, Steve Dorff and Steve Diamond, and recorded by American country music artist Lee Greenwood. It was released in November 1985 as the second single from the album Streamline. Greenwood's fifth number one country single in the United States, it spent one week at the top of the Billboard country chart in March 1986 and twelve weeks on the chart overall.

Time-saving bias

supported the predictions of the time-saving bias, as participants underestimated the time saved when increasing from a low speed and overestimated the

Time-saving bias is a concept that describes people's tendency to misestimate the time that could be saved (or lost) when increasing (or decreasing) speed.

In general, people underestimate the time that could be saved when increasing from a relatively low speed—e.g., 25 mph (40 km/h) or 40 mph (64 km/h)—and overestimate the time that could be saved when increasing from a relatively high speed—e.g., 55 mph (89 km/h) or 90 mph (140 km/h). People also underestimate the time that could be lost when decreasing from a low speed and overestimate the time that could be lost when decreasing from a high speed.

European countries. The first single was "Wasted", the second single was "Underestimated" and the third single was "The Calling". The album was re-released as

Best Kept Secret is the third studio album by American singer Jennifer Paige. It was released on April 25, 2008 in Germany and selected European countries. The first single was "Wasted", the second single was "Underestimated" and the third single was "The Calling". The album was re-released as a deluxe edition on November 20, 2009 featuring a few new songs, including the new single, "Beautiful Lie" with Nick Carter.

Long-nosed mole

V.V.; Abramov, A.V. (2016). "Secrets of the Underground Vietnam: an Underestimated Species Diversity of Asian Moles (Lipotyphla: Talpidae: Euroscaptor)"

The long-nosed mole (*Euroscaptor longirostris*) is a species of mammal in the family *Talpidae*. It is endemic to China, where it has a widespread distribution.

Orlov's mole (*E. orlovi*) and Kuznetsov's mole (*E. kuznetsovi*), both of which range from southern China into northern Vietnam, were formerly considered populations of *E. longirostris*, but a 2016 described them as distinct species. The Yangtze River is thought to serve as the barrier separating *E. longirostris* from the two southern species, with *E. longirostris* only being found north of the Yangtze.

Albertavenator

Albertavenator's discovery indicates that small dinosaur diversity may be underestimated at present due to the difficulty in identifying species from fragmentary

Albertavenator (meaning "Alberta hunter") is a genus of small troodontid theropod dinosaur, known from the early Maastrichtian in the Cretaceous period. It contains a single species, *A. curriei*, named after paleontologist Phil Currie, based on a partial left frontal found in the Horseshoe Canyon Formation of Alberta during the 1990s. Albertavenator's discovery indicates that small dinosaur diversity may be underestimated at present due to the difficulty in identifying species from fragmentary remains.
