What I said about the colors stays consistent for the majority of the level. It's mostly purple and blue, which are my personal favorite colors, and I think they're mixed very well. There are a few parts that stand out a bit in terms of style, such as Jeyzor's at. The same color scheme is used, though, and the gameplay remains memory, which keeps it connected enough to the rest to me. It's impossible to get this amount of creators and have them all create in the exact same style, and it would also just be very boring. Aside from keeping styles consistent, another difficulty of making megacollabs is keeping the quality itself consistent, which is probably of more importance. I'd say this does a good job at that, at least visually. There are definitely a few parts that are a bit boring and could have used some more effects or just better designs, but that's to be expected in a megacollab. While I do appreciate the nostalgia of some of the more oldschool design parts, these are the ones I like less personally. The more modern parts with effects added, such as flash and Goose are my personal favorites, but that may just be me. Nevertheless, the level of consistency here is still far above what you see in most megacollabs.

Something I can't comment on is the consistency of the gameplay or rather just the gameplay in general. I suspect few people will be able to as this will end up very high on the Demonlist. From what I can see of recent additions to the top of the list, this outclasses them in visual quality at least, and it's also just cool to see a memory level on there. I'm sure there have been many playtesters involved, making this as good as possible for this final version. Without playing it and considering the enjoyability, it should at least be clear and obvious to everyone that this level's gameplay is very unique. There are some incredibly cool ideas in this, and I have to applaud the creators for executing them this well. It's especially awesome how good the visuals work with the gameplay in the parts that have each made by separate people. For an example of unique gameplay, the best one is definitely the last part, starting at around. This is also where it starts diverging from the aforementioned color scheme, becoming more red and then orange, which I find fitting for the big climax of the level. How the part works speaks for itself. Unfortunately, I've run out of characters, so I'll just say this: Epic.
