

What About Law

Law book

A law book is a book about law. It is possible to make a distinction between "law books" on the one hand, and "books about law" on the other. This distinction

A law book is a book about law. It is possible to make a distinction between "law books" on the one hand, and "books about law" on the other. This distinction is "useful". A law book is "a work of legal doctrine". It consists of "law talk", that is to say, propositions of law.

"The first duty of a law book is to state the law as it is, truly and accurately, and then the reason or principle for it as far as it is known". The "first requisite in a law-book is perfect accuracy". A "law book is supposed to state what the law is rather than what it is not". "One great desideratum in a law book is facility of reference". A "list of law books and related materials" is a legal bibliography.

What About Brian

What About Brian? is an American comedy-drama television series created by Dana Stevens and co-produced by J. J. Abrams' company Bad Robot. The series

What About Brian? is an American comedy-drama television series created by Dana Stevens and co-produced by J. J. Abrams' company Bad Robot. The series premiered on April 16, 2006, on ABC, as a mid-season replacement and concluded on March 26, 2007. On May 16, 2006, ABC renewed the series for its second and final season, notably making it the only new series to be picked up by the network from the 2005–2006 television season, despite it being the final new series introduced by ABC during the season. The series returned October 9, 2006, with a full 22-episode season confirmed by November 10, 2006. The second season order was subsequently scaled back to 19 episodes by the network.

What About Brian? ended its run after two seasons on March 26, 2007.

About–Picard law

The 2001 About–Picard law [abu pika:r], officially the loi n° 2001-504 du 12 juin 2001 tendant à renforcer la prévention et la répression des mouvements

The 2001 About–Picard law [abu pika:r], officially the loi n° 2001-504 du 12 juin 2001 tendant à renforcer la prévention et la répression des mouvements sectaires portant atteinte aux droits de l'homme et aux libertés fondamentales, is French legislation passed by the National Assembly in 2000. The law is targeted at movements deemed to be "cults" (sectes) that "undermine human rights and fundamental freedoms", as well as "mental manipulation". The law has caused controversy internationally, with some commentators alleging that it infringes on religious freedom while proponents contend that it reinforces religious freedom.

What About Mimi?

What About Mimi? is a Canadian animated children's television series. The show was produced by Decode Entertainment and Studio B Productions (then DHX

What About Mimi? is a Canadian animated children's television series. The show was produced by Decode Entertainment and Studio B Productions (then DHX Media, now WildBrain). The show was first premiered on Teletoon (now Cartoon Network Canada) on October 4, 2000 with the final episode airing on August 14, 2002, leading up to three seasons and 39 episodes overall.

Animal law

way that violates the law, and what constitutes legal cruelty. Animal law permeates and affects most traditional areas of the law – including tort, contract

Animal law is a combination of statutory and case law in which the nature – legal, social or biological – of nonhuman animals is an important factor. Animal law encompasses companion animals, wildlife, animals used in entertainment and animals raised for food and research. The emerging field of animal law is often analogized to the environmental law movement because "animal law faces many of the same legal and strategic challenges that environmental law faced in seeking to establish a more secure foothold in the United States and abroad".

Animal law issues encompass a broad spectrum of approaches – from philosophical explorations of the rights of animals to pragmatic discussions about the rights of those who use animals, who has standing to sue when an animal is harmed in a way that violates...

What's So Amazing About Grace?

What's So Amazing About Grace? is a 1997 book by Philip Yancey, an American journalist and editor-at-large for Christianity Today. The book examines grace

What's So Amazing About Grace? is a 1997 book by Philip Yancey, an American journalist and editor-at-large for Christianity Today. The book examines grace in Christianity, contending that people crave grace and that it is central to the gospel, but that many local churches ignore grace and instead seek to exterminate immorality. What's So Amazing About Grace? includes Bible stories, anecdotes from Yancey's life, accounts of historical events and other stories. These include a modern retelling of the Parable of the Prodigal Son, an account of Yancey's friendship with Mel White who came out as gay, a comparison of the teachings of early Christians Pelagius and Augustine of Hippo, and a summary of Karen Blixen's short story "Babette's Feast".

Yancey was inspired to write What's So Amazing About...

Jurisprudence

Jurisprudence, also known as theory of law or philosophy of law, is the examination in a general perspective of what law is and what it ought to be. It investigates

Jurisprudence, also known as theory of law or philosophy of law, is the examination in a general perspective of what law is and what it ought to be. It investigates issues such as the definition of law; legal validity; legal norms and values; and the relationship between law and other fields of study, including economics, ethics, history, sociology, and political philosophy.

Modern jurisprudence began in the 18th century and was based on the first principles of natural law, civil law, and the law of nations. Contemporary philosophy of law addresses problems internal to law and legal systems and problems of law as a social institution that relates to the larger political and social context in which it exists. Jurisprudence can be divided into categories both by the type of question scholars...

Law of triviality

spending the majority of its time on discussions about relatively minor but easy-to-grasp issues, such as what materials to use for the staff bicycle shed

The law of triviality is C. Northcote Parkinson's 1957 argument that people within an organization commonly give disproportionate weight to trivial issues. Parkinson provides the example of a fictional committee whose job was to approve the plans for a nuclear power plant spending the majority of its time on discussions about

relatively minor but easy-to-grasp issues, such as what materials to use for the staff bicycle shed, while neglecting the proposed design of the plant itself, which is far more important and a far more difficult and complex task.

The law has been applied to software development and other activities. The terms bicycle-shed effect, bike-shed effect, and bike-shedding were coined based on Parkinson's example; it was popularized in the Berkeley Software Distribution community...

International law

Law Review. 5 (2): 124–152. doi:10.2307/1109809. JSTOR 1109809. Shao, Xuan (2021). "What We Talk about When We Talk about General Principles of Law";

International law, also known as public international law and the law of nations, is the set of rules, norms, legal customs and standards that states and other actors feel an obligation to, and generally do, obey in their mutual relations. In international relations, actors are simply the individuals and collective entities, such as states, international organizations, and non-state groups, which can make behavioral choices, whether lawful or unlawful. Rules are formal, typically written expectations that outline required behavior, while norms are informal, often unwritten guidelines about appropriate behavior that are shaped by custom and social practice. It establishes norms for states across a broad range of domains, including war and diplomacy, economic relations, and human rights.

International...

Law

its plural meant 'law'. But what, after all, is a law? [...] When I say that the object of laws is always general, I mean that law considers subjects

Law is a set of rules that are created and are enforceable by social or governmental institutions to regulate behavior, with its precise definition a matter of longstanding debate. It has been variously described as a science and as the art of justice. State-enforced laws can be made by a legislature, resulting in statutes; by the executive through decrees and regulations; or by judges' decisions, which form precedent in common law jurisdictions. An autocrat may exercise those functions within their realm. The creation of laws themselves may be influenced by a constitution, written or tacit, and the rights encoded therein. The law shapes politics, economics, history and society in various ways and also serves as a mediator of relations between people.

Legal systems vary between jurisdictions...
