Debunking Economics: The Naked Emperor of the Social Sciences is a book by the economist Steve Keen about the problems with mainstream economics. The book was initially published by Zed Books in 2001, and a revised and updated version was published in 2011. Translated versions were also published in Spanish, French and Chinese. The book is suitable for a general reader, and uses words and figures rather than equations to make its points, but is aimed at those with at least some basic knowledge of economics.

Dirk Bezemer

at the Threshold; Rethinking the Real and Financial Economies Inside the Crystal Ball; How to Make and Use Forecasts Debunking Economics; The Naked Emperor

Dirk Bezemer (born 1971) is a Dutch economist who is a professor at the Faculty of Economics and Business of the Rijksuniversiteit Groningen. He studied at Wageningen University (M.Sc. in Economics (1995)) and University of Amsterdam & Tinbergen Institute (Ph.D. in Economics (2001)). His topics of expertise include the financial sector, credit creation, credit cycles, monetary policy, and the cause of economic crises. Bezemer provides commentary at the Centre for Economic Policy Research and De Groene Amsterdammer. In a September 2009 opinion piece in the Financial Times he wrote that a dozen economists whom he listed had predicted the 2008 financial crisis but were ignored.

Law of supply

Steve (2011). "Chapter 5: The price of everything and the value of nothing". Debunking Economics: The Naked Emperor Dethroned?. Zed Books. ISBN 978-1848139923

The law of supply is a fundamental principle of economic theory which states that, keeping other factors constant, an increase in price results in an increase in quantity supplied. In other words, there is a direct relationship between price and quantity: quantities respond in the same direction as price changes. This means that producers and manufacturers are willing to offer more of a product for sale on the market at higher prices, as increasing production is a way of increasing profits.

In short, the law of supply is a positive relationship between quantity supplied and price, and is the reason for the upward slope of the supply curve.

Some heterodox economists, such as Steve Keen and Dirk Ehnts, dispute the law of supply, arguing that the supply curve for mass-produced goods is often downward...

Supply (economics)

Steve (2011). "Chapter 5: The price of everything and the value of nothing". Debunking Economics: The Naked Emperor Dethroned?. Zed Books. ISBN 978-1848139923

In economics, supply is the amount of a resource that firms, producers, labourers, providers of financial assets, or other economic agents are willing and able to provide to the marketplace or to an individual. Supply can be in produced goods, labour time, raw materials, or any other scarce or valuable object. Supply is often plotted graphically as a supply curve, with the price per unit on the vertical axis and quantity supplied as a function of price on the horizontal axis. This reversal of the usual position of the dependent variable and the independent variable is an unfortunate but standard convention.

The supply curve can be either for an individual seller or for the market as a whole, adding up the quantity supplied by all sellers. The quantity supplied is for a particular time period...

Environmental policy

Debunking Economics. The Naked Emperor Dethroned? London: Zed Books. eISBN 9781780322209
Ostrom, Elinor (2015-09-23). Governing the Commons. Cambridge University

Environmental policy is the commitment of an organization or government to the laws, regulations, and other policy mechanisms concerning environmental issues. These issues generally include air and water pollution, waste management, ecosystem management, maintenance of biodiversity, the management of natural resources, wildlife and endangered species.

For example, concerning environmental policy, the implementation of an eco-energy-oriented policy at a global level to address the issue of climate change could be addressed.

Policies concerning energy or regulation of toxic substances including pesticides and many types of industrial waste are part of the topic of environmental policy. This policy can be deliberately taken to influence human activities and thereby prevent undesirable effects...

Wikipedia:Language learning centre/Word list

*detestably detestation detested detester detesters detesting detests dethrone dethroned detonate detonated
detonates detonating detonation detonations detonator*

Drawing up a comprehensive list of words in English is important as a reference when learning a language as it will show the equivalent words you need to learn in the other language to achieve fluency. A big list will constantly show you what words you don't know and what you need to work on and is useful for testing yourself. Eventually these words will all be translated into big lists in many different languages and using the words in phrase contexts as a resource. You can use the list to generate your own lists in whatever language you're learning and to test yourself.
