

Antartide

National Antarctic Research Program

National Antarctic Research Program (Programma Nazionale di Ricerche in Antartide or PNRA) is the Italian Antarctic research program. The PNRA is directed

National Antarctic Research Program (Programma Nazionale di Ricerche in Antartide or PNRA) is the Italian Antarctic research program.

The PNRA is directed by the Ministry of Education, University and Research (MIUR) through two national bodies: the National Research Council of Italy (CNR) for the coordination of scientific research and the National Agency for New Technologies, Energy and Sustainable Economic Development (ENEA) for the implementation of the Antarctic expeditions, for logistics and the maintenance of the two Antarctic stations.

Italy started its National Antarctic Program in 1985 with the formation of the Programma Nazionale di Ricerche in Antartide (PNRA) and the National Scientific Committee for Antarctica (CSNA).

Italy maintains two Antarctic research stations. The first one...

Zucchelli Station

activities, which conducted for sixteen years, for the ENEA-Unità Tecnica Antartide as part of the National Antarctic Research Program (PNRA). The main functions

Zucchelli Station is an Italian seasonal research station in Antarctica, located at Terra Nova Bay on a granitic headland along the coast of the Northern Foothills to the north-east of Gerlache Inlet. It has been named after Mario Zucchelli, director of the activities, which conducted for sixteen years, for the ENEA-Unità Tecnica Antartide as part of the National Antarctic Research Program (PNRA).

The main functions carried out by the Station are:

logistic support to scientific personnel operating in remote fields

logistical and operational support to the oceanographic ship

support to research activities with laboratories and instrumentation

support to personnel and material in transit for Concordia Station

support to air operations

Sewing-Machine Needles

Antarctic Research (SCAR), Collated by Programma Nazionale di Ricerche in Antartide (PNRA-Italy) for the SCAR Standing Committee on Antarctic Geographic Information

Sewing-Machine Needles, also known as Rocas Ministro Ezcurra (62°58'11.8"S 60°29'39.1"W) is a group of three prominent rock needles, the highest 45 m above water, lying close southeast of Rancho Point, Deception Island, in the South Shetland Islands. The name Sewing-Machine Rock was given by whalers for what was originally a conspicuous natural arch. Needles is now considered the more suitable descriptive term; an earthquake tremor in 1924 caused the arch to collapse. The name Rocas Ministro Ezcurra was given by Dr Douglas (later Sir Douglas) Mawson, leader of the Australasian Antarctic Expedition of 1912-14.

These rocks are remnants of a tuff cone, part of the Baily Head Formation.

List of geography awards

Missioni Nazionali di Ricerca di Alta Valenza Scientifica in Artide, Antartide, Campo Aerospaziale (PDF). Ministero della Difesa. Retrieved 27 July

This list of geography awards is an index to articles about notable awards for geography, the field of science devoted to the study of the lands, features, inhabitants, and phenomena of the Earth and planets. The list is organized by the region and country of the organization who gives the award. Awards are not necessarily limited to people from the award-giver's country.

Kamil Crater

Space.com. Retrieved 2010-08-12. *"The Kamil Crater"*. Museo Nazionale Antartide. Archived from the original on 2010-10-17. Retrieved 2010-08-12. L. Folco;

The Kamil Crater is a 44.8-metre-wide (147 ft) and 15.8-metre-deep (52 ft) (original depth, a part covered by sand at present) meteorite impact crater in the East Uweinat Desert in southwestern New Valley Governorate, Egypt, only 0.6 km (0.4 mi) north of the border with the Sudan and 600 m (2,000 ft) above sea level. It was located in 2008 using Google Earth satellite imagery by Vincenzo de Michele (former curator of the Museo Civico di Storia Naturale di Milan in Milan, Italy). It is one of the few craters on Earth with a well-preserved ray system.

Enrico Alleva

Space Agency, CNR Department "Scienze della vita", and the Commissione Antartide. He is a corresponding member of the Accademia dei Lincei, Accademia Medica

Enrico Alleva (born 16 August 1953 in Rome, Italy) is an Italian ethologist. He has been president of the Società Italiana di Etologia (Italian Ethological Society) since 2008.

After obtaining his degree in biological sciences at the Sapienza University of Rome (1975) with geneticist Giuseppe Montalenti, Alleva specialized in animal behaviour at the Scuola Normale Superiore di Pisa (tutored by Floriano Papi). Alleva is a member of the scientific councils of Agenzia per la protezione dell'ambiente e per i servizi tecnici, World Wide Fund for Nature, Legambiente, Stazione Zoologica Anton Dohrn, Istituto della Enciclopedia Italiana "Giovanni Treccani", Italian Space Agency, CNR Department "Scienze della vita", and the Commissione Antartide. He is a corresponding member of the Accademia dei Lincei...

List of airports in Antarctica

of Zucchelli Station (PDF). ATCM XXXVIII. Retrieved 19 August 2020. *Antartide: primo volo tecnico sulla pista*. ENEA. 21 November 2022. Retrieved 16

This is an alphabetical list of airports in Antarctica, including airstrips, heliports and skiways (snow runways).

Sitry Airstrip

September 2020. *Data Access*. Antarctic Meteo-Climatological Observatory. ClimAntartide. Retrieved 1 September 2020. Portals: Geography Earth sciences

Sitry Airstrip, the name is derived from the abbreviation of C-3, was an Antarctic skiway operated by the Italian ENEA-Unità Tecnica Antartide as part of the National Antarctic Research Program (PNRA).

The airstrip is located at 2,053 metres (6,736 ft) above the sea level on the Antarctic Plateau and is 600 kilometres (370 mi) from Zucchelli Station. The skiway was used, since 2000, by the Italian personnel as fuel depot and refuelling point for the Twin Otters flying from Zucchelli Station to Concordia Station.

Sitry was visited for the last time, by the Italian researchers, in 2010; it was equipped with a shelter, which in case of emergency, could accommodate 8 people.

The skiway was abandoned because of sastrugi and the impossibility for the Twin Otters to land, however it is planned to...

Meganne Christian

Concordia la diretta dall'Antartide a cura dell'ENEA programma di ricerca Antartide. Il Terzo News (in Italian). Archived from the original on 3 February

Meganne Louise Christian (born 1987) is a member of the 2022 European Space Agency Astronaut Group, and Reserve Astronaut and Exploration Commercialisation Lead at the UK Space Agency.

She was previously a materials scientist at the National Research Council (CNR) in Bologna, Italy, and atmospheric physicist at Concordia Station in Antarctica.
