How Much is Enough?

In 1930 the great economist Keynes predicted that, over the next century, income would rise steadily, people's basic needs would be met and no one would have to work more than fifteen hours a week. Why was he wrong? Robert and Edward Skidelsky argue that wealth is not - or should not be - an end in itself, but a means to 'the good life'. Tracing the concept from Aristotle to the present, they show how far modern life has strayed from that ideal. They reject the idea that there is any single measure of human progress, whether GDP or 'happiness', and instead describe the seven elements which, they argue, make up the good life, and the policies that could realize them. ROBERT SKIDELSKY is Emeritus Professor of Political Economy at the University of Warwick. His biography of Keynes received numerous prizes, including the Lionel Gelber Prize and the Council on Foreign Relations Prize for International Relations. He was made a life peer in 1991, and a Fellow of the British Academy in 1994. EDWARD SKIDELSKY is a lecturer in the Philosophy Department of the University of Exeter. He contributes regularly to the New Statesman, Spectator and Prospect. His previous books include *The Conditions of Goodness* and *Ernst Cassirer: The Last Philosopher of Culture*.

Not Far Enough

In 1904, a woman was arrested on Fifth Avenue for smoking a cigarette, while a procession of bemused smoking males passed by unharassed. For the next 50 years, with the creative encouragement of the emerging giants of the cigarette industry, the right to smoke became a symbol of women's liberation and equality. That liberation came at a terrible price. As the lung cancer rate for women soared, passing breast cancer as the leading cause of cancer in women in 1985, women achieved a grisly equality. On February 4, 1987, a group of women leaders active both in public health and in a wide diversity of women's organizations-gathered together in Washington to take stock of the common effort. A series of papers-on smoking's role in women's disease and death, on women's smoking behavior, on the role of the tobacco industry-set the stage for an intensive effort by the participants, working in small groups, to hammer out together an agenda of strategies to combat smoking among women. The highlights of those papers, and a synthesis of the most favored strategies, form the body of this report. For 50 years, smoking reigned as a symbol of women's freedom. Now we know that smoking only substituted one form of enslavement for another. That's why the workshop participants chose to name their effort, the "Not Far Enough Network."

Use your advantage to fight for social change with this resource guide for people with class privilege who are tired of cover-ups and ready to figure out how to use privilege for the good of the world. The fight for economic justice can draw stark battle lines, with the fight portrayed simplistically as Us versus Them, with the rich in the role of "Them." So where does that leave young people with wealth who believe in social change? Afraid of being branded the enemy, yet deeply committed to social justice, they're left in a confusing no-man's land. This conflict can lead most young people with wealth to keep their privilege hidden, making it impossible for them to bring their resources, access, and connections to the struggle for social change. Coauthored by Karen Pittelman, who dissolved her \$3 million trust fund to cofound a foundation for low-income women activists, *Classified* is a resource guide for people with class privilege who are tired of cover-ups and ready to figure out how their privilege really works. Complete with comics, exercises, and personal stories, this book gives readers the tools they need to put their privilege to work for social change.

An Essay Concerning Human Understanding

Ghost Tribes takes place in a semi-fictional verisimilitude of the continent of Africa wherein which all the tribes are ruled by kings, smaller breakaway tribes are ruled by chiefs, and all are governed by the council of paramount—a legion of the noble tribes of the continent. The principal story follows the tale of Likando and the war of the brother kings. Likando is the Lozi tribe's princess, heir-elect to the throne, and the only legitimate child of the Lozi king, Simasiku Lumeta. However, growing without the presence of her mother, and her father never having told her the story of who her mother is or where she is or if she is even alive

today, causes her to begin searching for the truth against her father's permission and/or consent. She stumbles upon darker truths that result in her to learn that her birth may not have been a result of love or mere chance, but a carefully considered and planned series of events. This leads the princess into taking courses of action that bring her tribe, family, and overall kingdom to the brink of near-extinction. The second part of the tale which begins eight years before the events of the first novel follows the story of Kaleya, the lost son of nothing who, after waking up alone in the jungle with no memory of his identity or his past prior, goes on a quest to discover the truth behind his stolen memories but entangles himself in a series of circumstances that result in him having to fight for his survival more often than not. The second part of the story simultaneously chronicles the Ghost of Africa, an enigma thought to be a demon that terrorizes tribes around a territory it claimed as its own three years before the events of the novel. Before the Ghost of Africa occupied the territory it occupies, there lived a thriving tribe with an organized structure and an army of possessed soldiers, ten thousand strong. However, when the Ghost of Africa first emerged, it led an army of exiled tribesmen-turned cannibal, who form the population referred to as the cannibals tribeless in the millions, against the growing tribe and thus, overwhelming its army and having the cannibals devour the raw flesh of the men, women, and children of the tribe. After wiping out of existence the tribe that existed in its territory prior, the demon goes on to fence that very territory with the skulls of the tribe's populist on barbed wooden stakes in the hundreds of thousands all around that territory as a warning for anyone who ever dared to trespass. The first book in the series, *The Ghost of Africa*, opens with Likando, the heir-elect to the Lozi throne, preparing for the maturity ceremony who gets ambushed by a gang of purported 'mixed-breeds'. This series of events leads her to come face-to-face with the Ghost of Africa.
