In software engineering, profiling (program profiling, software profiling) is a form of dynamic program analysis that measures, for example, the space (memory) or time complexity of a program, the usage of particular instructions, or the frequency and duration of function calls. Most commonly, profiling information serves to aid program optimization, and more specifically, performance engineering.

Profiling is achieved by instrumenting either the program source code or its binary executable form using a tool called a profiler (or code profiler). Profilers may use a number of different techniques, such as event-based, statistical, instrumented, and simulation methods.

## L-DOPA

*Agricultural and Biological Chemistry*. 55 (2): 617–618. doi:10.1080/00021369.1991.10870627. Hsieh EJ, Liao SW, Chang CY, Tseng CH, Wang SL, Grillet L (2023)

L-DOPA, also known as l-3,4-dihydroxyphenylalanine and used medically as levodopa, is made and used as part of the normal biology of some plants and animals, including humans. Humans, as well as a portion of the other animals that utilize l-DOPA, make it via biosynthesis from the amino acid l-tyrosine.

L-DOPA is the precursor to the neurotransmitters dopamine, norepinephrine (noradrenaline), and epinephrine (adrenaline), which are collectively known as catecholamines. Furthermore, l-DOPA itself mediates neurotrophic factor release by the brain and central nervous system. In some plant families (of the order Caryophyllales), l-DOPA is the central precursor of a biosynthetic pathway that produces a class of pigments called betalains.

L-DOPA can be manufactured and in its pure form is sold as...

TouchWiz is a discontinued user interface developed by Samsung Electronics with partners, featuring a full touch user interface. It is sometimes incorrectly referred to as an operating system. TouchWiz was used internally by Samsung for smartphones, feature phones, and tablet computers, and was not available for licensing by external parties. The Android version of TouchWiz also comes with the Samsung-made app store Galaxy Apps. It was replaced by Samsung Experience in 2017 with the release of Android 7.0 "Nougat".

Samsung's approach to its TouchWiz UI was distinct from its Android version updates. While Android updates brought new features and improvements to the operating system, Samsung often customized its UI separately. This meant that even if two devices ran the same Android version...

Worcestershire sauce or Worcester sauce ( WUUST-ʔr(-shʔr)) is a fermented liquid condiment invented by pharmacists John Wheeley Lea and William Henry Perrins in the city of Worcester in Worcestershire, England, during the first half of the 19th century. The inventors went on to form the company Lea & Perrins. Worcestershire sauce has been a generic term since 1876, when the High Court of Justice ruled that Lea & Perrins did not own a trademark for the name "Worcestershire".

Worcestershire sauce is used directly as a condiment on steaks, hamburgers, and other finished dishes, and to flavour cocktails such as the Bloody Mary and Caesar. It is also frequently used to augment recipes such as Welsh rarebit, Caesar salad, Oysters Kirkpatrick, and devilled eggs. As both a background flavour and a...
