"(The Angels Wanna Wear My) Red Shoes" is a song written and recorded by Elvis Costello for his 1977 debut album My Aim Is True. Written by Costello on

"(The Angels Wanna Wear My) Red Shoes" is a song written and recorded by Elvis Costello for his 1977 debut album My Aim Is True. Written by Costello on a train ride to Liverpool in 1976, the song features lyrics, according to Costello, about "romantic disappointment". The song features Byrds-inspired music with an intro contributed by John McFee of Costello's then-backing band Clover.

"(The Angels Wanna Wear My) Red Shoes" was released as the third single from My Aim Is True. Despite greater exposure than Costello's past singles, the song failed to chart in the UK. The song received positive reception from critics and remains a staple of Costello's live set.

Sheehan, Jan (2009-04-13). "A Guide to Choosing Running Shoes

Foot - Cross country running shoes or Trail running shoes are made for cross country running, a form of long distance running. Season-specific trainers are available for different types of training.

Climbing shoe

multi-pitch. Aggressive shoes feature a stronger downturn than moderate shoes. This style of shoe is often the most painful to wear for climbers due to its

A climbing shoe is a specialized type of footwear designed for rock climbing. Typical climbing shoes have a tight fit, an asymmetrical downturn, and a sticky rubber sole with an extended rubber rand to the heel and the toe. Different types of shoes can be better suited for different levels of technique and routes.

Shoe

vulnerable, and shoes provide protection. Form was originally tied to function, but over time, shoes also became fashion items. Some shoes are worn as safety

A shoe is an item of footwear intended to protect and comfort the human foot. Though the human foot can adapt to varied terrains and climate conditions, it is vulnerable, and shoes provide protection. Form was originally tied to function, but over time, shoes also became fashion items. Some shoes are worn as safety equipment, such as steel-toe boots, which are required footwear at industrial worksites.

Additionally, shoes have often evolved into many different designs; high heels, for instance, are most commonly worn by women during fancy occasions. Contemporary footwear varies vastly in style, complexity and cost. Basic sandals may consist of only a thin sole and simple strap and be sold for a low cost. High fashion shoes made by famous designers may be made of expensive materials, use complex...

High-heeled shoe

High-heeled shoes, also known as high heels (colloquially shortened to heels), are a type of shoe with an upward-angled sole. The heel in such shoes is raised

High-heeled shoes, also known as high heels (colloquially shortened to heels), are a type of shoe with an upward-angled sole. The heel in such shoes is raised above the ball of the foot. High heels cause the legs to appear longer, make the wearer appear taller, and accentuate the calf muscle.

There are many types of high heels in varying styles, heights, and materials. High heels have been used in various ways to convey nationality, professional affiliation, gender, and social status. High heels have been an important statement piece of fashion for centuries in the West.

High heels spread from equestrian origins with the 10th century Persian galesh to wider fashion use. In early 17th-century Europe, high heels were a sign of masculinity and high social status. Towards the end of the century...

Kung fu shoe

kind of shoe originating from the Pyrenees. Japanese tabi, one variety of which is soft cloth shoes. Jutti, North Indian shoes. "What to Wear to Your

The kung fu shoe, also known as a "tai chi shoe" or as a "martial arts slipper", is a type and style of cloth slip-on shoe that is traditionally made in China, and was originally worn while practicing kung fu and other martial arts, and also while performing tai chi.

Variants of this shoe are now mass-produced for general-purpose wear, and there are several slightly different styles. These shoes are inexpensive and are available worldwide.

One common kind is cheaply produced and is typically black, with minimal lining; it has a low-sided cloth upper, and a pale brown hard plastic sole. One variant is made as a lace-up shoe rather than a slip-on shoe. A version of the shoe for girls and women has a buckle strap and resembles the Mary Jane shoe. Some varieties of the kung fu shoe have reinforced...

Removal of footwear indoors

are expected to remove their shoes when visiting others's homes, and what people wear on their feet in homes if not shoes. Additionally, in some places

Traditions of removing shoes in the home vary greatly between the world's cultures. These customs impact whether people remove their shoes when coming home, whether people are expected to remove their shoes when visiting others' homes, and what people wear on their feet in homes if not shoes. Additionally, in some places, similar customs exist in places of worship or education.

Wearable technology

silicon nanomembranes. Smart shoes are an example of wearable technology that incorporate smart features into shoes. Smart shoes often work with smartphone

Wearable technology is a category of small electronic and mobile devices with wireless communications capability designed to be worn on the human body and are incorporated into gadgets, accessories, or clothes. Common types of wearable technology include smartwatches, fitness trackers, and smartglasses. Wearable electronic devices are often close to or on the surface of the skin, where they detect, analyze, and transmit information such as vital signs, and/or ambient data and which allow in some cases immediate biofeedback to the wearer. Wearable devices collect vast amounts of data from users making use of different behavioral and physiological sensors, which monitor their health status and activity levels. Wrist-worn devices include smartwatches with a touchscreen display, while wristbands...

Patten (shoe)

intervening pair of footwear and thus the name was sometimes extended to similar shoes like clogs. In modern use, however, the term is properly restricted to overshoes

Pattens, also known by other names, are protective overshoes that were worn in Europe from the Middle Ages until the early 20th century. In appearance, they sometimes resembled contemporary clogs or sandals. Pattens were worn outdoors over a normal shoe, had a wooden or later wood and metal sole, and were held in place by leather or cloth bands. Pattens functioned to elevate the foot above the mud and dirt (including human effluent and animal dung) of the street, in a period when road and urban paving was minimal. Women continued to wear pattens in muddy conditions until the 19th or even early 20th century.

Super shoes

Super shoes or carbon-plated shoes are a type of lightweight running shoe incorporating carbon fiber plates and thick foam soles. They are typically used

Super shoes or carbon-plated shoes are a type of lightweight running shoe incorporating carbon fiber plates and thick foam soles. They are typically used in long-distance running, including trail running and marathons. Since their introduction on the road in 2016, and more recently on the track in 2019, super shoes have coincided with a series of record-breaking times in middle to long-distance running events.
