COUP-TFII

interacts with p300 and myoD . *Nucleic Acids Res.* 26 (23): 5501–10. doi:10.1093/nar/26.23.5501. PMC 147985. PMID 9826778. Avram D, Ishmael JE, Nevriy DJ

COUP-TFII (COUP transcription factor 2), also known as NR2F2 (nuclear receptor subfamily 2, group F, member 2) is a protein that in humans is encoded by the NR2F2 gene. The COUP acronym stands for chicken ovalbumin upstream promoter.

J. Kenneth Campbell is an American film, stage, and television actor who has been cast in over 80 roles. He was born in Flushing, New York. Campbell studied acting under theatrical fight director Patrick Crean, and was an acting instructor himself at the Stratford Shakespeare Festival.

Voiced palatal lateral approximant

America. 8 (1). *Linguistic Society of America:* 7. doi:10.3765/plsa.v8i1.5501. Stenson (1991), cited in Hickey (2004:71) Wells (1982), p. 490. Árnason

A voiced palatal lateral approximant is a type of consonantal sound used in some spoken languages. The symbol in the International Phonetic Alphabet that represents this sound is ʎ, a rotated lowercase letter y.

Many languages that were previously thought to have a palatal lateral approximant actually have a lateral approximant that is, broadly, alveolo-palatal; that is to say, it is articulated at a place in-between the alveolar ridge and the hard palate (excluded), and it may be variously described as alveolo-palatal, lamino-postalveolar, or postalveolo-prepalatal. None of the 13 languages investigated by Recasens (2013), many of them Romance, has a 'true' palatal. That is likely the case for several other languages listed here. Some languages, like Portuguese and Catalan, have a lateral...

Comboios de Portugal

See the timetable at www.cp.pt "Linha do Leste

Comboios Regionais 5500 e 5501| CP". Archived from the original on 2017-08-31. Retrieved 2017-08-31. Wikimedia - CP — Comboios de Portugal, EPE ([kõ?b?ju? ð? pu?tu??al]; lit. 'Trains of Portugal') is a state-owned company which operates passenger trains in Portugal. Prior to June 2009, CP stood for Caminhos de Ferro Portugueses (English: Portuguese Railways) although the company has been using its current designation as a brand name since 2004.

CP can trace its origins back to October 1856 and the opening of the first railway line in Portugal; the majority of the network has long comprised Iberian gauge lines, compatible with neighboring Spain. During the 1950s, the Portuguese railway network spanned roughly 3,750 km (2,330 mi), its greatest extent. In 1975, the Portuguese Railway Company was nationalised. Amid a decline in passenger numbers, various lines were shut down, with almost a quarter of the...

Extrachromosomal rDNA circle

(3rd ed.). Netherlands: Springer. pp. 629. doi:10.1007/978-1-4020-6754-9_5501. ISBN 978-1-4020-6753-2. Cohen S, Yacobi K, Segal D (June 2003). "Extrachromosomal

Extrachromosomal rDNA circles (aka ERC) are pieces of extrachromosomal circular DNA (eccDNA) derived from ribosomal DNA (rDNA). Initially found in baker's yeast, these self-replicating circles are suggested to contribute to their aging and found in their aged cells. Like ordinary eccDNA, they are created by intra-molecular homologous recombination of the chromosome. The process for intra-molecular homologous recombination is independent of chromosomal replication. The de novo generated circles had exact multiples of tandem copies of 2-kb fragments from cosmid templates. The tandem organization is essential to circle formation. Looping out of organized ribosomal genes in intergenic nontranscribed spacers yielded either large or small repeat circles dependent on large or short repeats of the...

Uroplakin-3a

invasive urothelial carcinoma of the bladder " Clin. Cancer Res. 9 (15): 5501–7. PMID 14654529. Collins JE, Wright CL, Edwards CA, et al. (2005). "A genome

Uroplakin-3a (UP3a) is a protein that in humans is encoded by the UPK3A gene.

UP3a is found in the inner membrane of the urinary bladder and contributes to the strength of that membrane and to the membrane's ability to stretch when the bladder is full. It is also found in the renal pelvis, ureter, and prostatic urethra.

Bruce, ed. (2000). *Chambers Dictionary of World History*. Chambers. ISBN 0-5501-3000-4. Jenkins, Elizabeth (1978). *The Princes in the Tower*. Coward, McCann

Richard Woodville, 1st Earl Rivers (1405 – 12 August 1469), also Wydeville, was the father of Elizabeth Woodville and father-in-law of Edward IV.

Portuguese military aircraft serials

deviations had been: Vought A-7P Corsair II: Received serial numbers in the range 5501 to 5550, not being fighters. Lockheed P-3P Orion: Received serial numbers

In Portugal to identify individual aircraft, all military aircraft are allocated and display a serial number. A common serial number system is used for aircraft operated by the three military branches, the Portuguese Air Force, Portuguese Naval Aviation and Portuguese Army. Individual agencies have each their own system.

Some aircraft that were acquired and offered to Portugal, even before the organization of the military aviation as an entity, never received serials, being only identified by their own names.
