What on Earth? is an American television program broadcast on Science Channel. It examines strange satellite imagery and speculates on what caused the strange phenomena visible. The program debuted in February 2015. It was Science Channel's most watched program and was renewed for a third season in 2016 and a fourth season in 2017.

The series features Karen Bellinger, Brittany Brand, Mike Capps, Devin Dennie, Andrew Gough, Steven Kearney, Alan Lester, Jim Marrs, Rob Nelson, and Nick Pope.

In 2023, WOE returned for the twelfth season of episodes (1 -10) (Jan 12, 2023 through March 16, 2023). As of September 3, 2024, the show had not been cancelled.

What on Earth Have I Done Wrong?!

What on Earth Have I Done Wrong?! is a 2007 Taiwanese comedy film directed, co-written, and co-produced by Doze Niu, starring himself as struggling film

What on Earth Have I Done Wrong?! is a 2007 Taiwanese comedy film directed, co-written, and co-produced by Doze Niu, starring himself as struggling film director-producer "Doze Niu", in his feature film debut. Billed as "an honest outlook inside Doze Niu's life and Taiwan's entertainment industry", the low-budget mockumentary was shot mainly home movie-style with little background music. Most of the actors portrayed themselves (or at least satirized versions).

Earth

Earth is the third planet from the Sun and the only astronomical object known to harbor life. This is enabled by Earth being an ocean world, the only one

Earth is the third planet from the Sun and the only astronomical object known to harbor life. This is enabled by Earth being an ocean world, the only one in the Solar System sustaining liquid surface water. Almost all of Earth's water is contained in its global ocean, covering 70.8% of Earth's crust. The remaining 29.2% of Earth's crust is land, most of which is located in the form of continental landmasses within Earth's land hemisphere. Most of Earth's land is at least somewhat humid and covered by vegetation, while large ice sheets at Earth's polar deserts retain more water than Earth's groundwater, lakes, rivers, and atmospheric water combined. Earth's crust consists of slowly moving tectonic plates, which interact to produce mountain ranges, volcanoes, and earthquakes. Earth has a liquid...

What on Earth! (film)

What on Earth! (French: La Terre est habitée!) is a 1966 National Film Board of Canada animated short co-directed by Les Drew and Kaj Pindal. The film

What on Earth! (French: La Terre est habitée!) is a 1966 National Film Board of Canada animated short co-directed by Les Drew and Kaj Pindal. The film is a mockumentary, introduced in its opening credits as produced by the "National Film Board of Mars" that takes a humorous look at car culture from the point of view of fictional Martians, who mistake automobiles for Earth's true inhabitants and people as their parasites. It attempts to examine the sociology of the automobile as the dominant species on earth, and makes wild guesses about the lifestyle, feeding habits, mating habits and funeral rites of this "species."

Internal structure of Earth

The internal structure of Earth is the layers of the Earth, excluding its atmosphere and hydrosphere. The structure consists of an outer silicate solid

The internal structure of Earth is the layers of the Earth, excluding its atmosphere and hydrosphere. The structure consists of an outer silicate solid crust, a highly viscous asthenosphere, and solid mantle, a liquid outer core whose flow generates the Earth's magnetic field, and a solid inner core.

Scientific understanding of the internal structure of Earth is based on observations of topography and bathymetry, observations of rock in outcrop, samples brought to the surface from greater depths by volcanoes or volcanic activity, analysis of the seismic waves that pass through Earth, measurements of the gravitational and magnetic fields of Earth, and experiments with crystalline solids at pressures and temperatures characteristic of Earth's deep interior.

Earth Day is an annual event on April 22 to demonstrate support for environmental protection. First held on April 22, 1970, it now includes a wide range of events coordinated globally through earthday.org (formerly Earth Day Network) including 1 billion people in more than 193 countries.

In 1969 at a UNESCO conference in San Francisco, peace activist John McConnell proposed a day to honor the Earth and the concept of peace, to first be observed on March 21, 1970, the first day of spring in the northern hemisphere. This day of nature's equipoise was later sanctioned in a proclamation written by McConnell and signed by Secretary General U Thant at the United Nations. A month later, United States senator Gaylord Nelson proposed the idea to hold a nationwide environmental teach-in on April 22,...

Christopher Lloyd (born 1 April 1968) is a historian, educationalist and author on Big History. He is the author of What on Earth Happened: The Complete Story of the Planet (Bloomsbury, 2008), which has sold 500,000 copies. Lloyd is an advocate of connected learning. In collaboration with Beckenham-based illustrator Andy Forshaw, Lloyd has established a format for telling giant narratives to young people by using illustrative timelines called Wallbooks, which present a broader view of world history and visualise connections between the past and the present day.

Lloyd gives talk at schools, literary festivals, universities, societies, museums, businesses and institutes on a variety of topics including cross-curricular integration, narrative journeys around each of his books as well as motivational...

Flat Earth

Earth is an archaic and scientifically disproven conception of the Earth's shape as a plane or disk. Many ancient cultures subscribed to a flat-Earth

Flat Earth is an archaic and scientifically disproven conception of the Earth's shape as a plane or disk. Many ancient cultures subscribed to a flat-Earth cosmography. The model has undergone a recent resurgence as a conspiracy theory in the 21st century.

The idea of a spherical Earth appeared in ancient Greek philosophy with Pythagoras (6th century BC). However, the early Greek cosmological view of a flat Earth persisted among most pre-Socratics (6th–5th century BC). In the early 4th century BC, Plato wrote about a spherical Earth. By about 330 BC, his former student Aristotle had provided strong empirical evidence for a spherical Earth. Knowledge of the Earth's global shape gradually began to spread beyond the Hellenistic world. By the early period of the Christian Church, the spherical view...

Earth religion

Earth religion or nature worship is a system of religion based on the veneration of natural phenomena. It covers any religion that worships the earth

Earth religion or nature worship is a system of religion based on the veneration of natural phenomena. It covers any religion that worships the earth, nature, or fertility deity, such as the various forms of goddess worship or matriarchal religion. Some find a connection between earth-worship and the Gaia hypothesis. Earth religions are also formulated to allow one to utilize the knowledge of preserving the earth.
