

Identical

Identical

up identical in Wiktionary, the free dictionary. Identical may refer to: Identical, when two things are the same, see Identity (philosophy) Identical (Hopkins

Identical may refer to:

Identical, when two things are the same, see Identity (philosophy)

Identical (Hopkins novel), a 2008 young adult novel by Ellen Hopkins

Identical (Turow novel), a 2013 legal drama novel by Scott Turow

The Identical, a 2014 American musical drama film

Mathematically identical

Identical (film), a 2011 American independent thriller film

Identical (musical), a 2022 stage musical

"Identical", a song by Phoenix from Alpha Zulu, 2022

The Identical

The Identical is a 2014 American musical drama film directed by Dustin Marcellino and written by Howard Klausner. The film was released theatrically in

The Identical is a 2014 American musical drama film directed by Dustin Marcellino and written by Howard Klausner. The film was released theatrically in the United States on September 5, 2014. It was universally panned by both critics and audiences, and only grossed \$2.8 million on a \$16 million budget.

Identical Strangers

Identical Strangers: A Memoir of Twins Separated and Reunited is a 2007 memoir written by identical twins Elyse Schein and Paula Bernstein and published

Identical Strangers: A Memoir of Twins Separated and Reunited is a 2007 memoir written by identical twins Elyse Schein and Paula Bernstein and published by Random House. The authors, born in New York City in 1968 to Leda Witt, daughter of Nathan Witt, were separated as infants, in part, to participate in a "nature versus nurture" twin study. They were adopted by separate families in the New York area who were unaware that each girl had a twin sister. Soon after the twins reunited for the first time in 2004 at the age of 35, they began writing the book. Of the 13 or more children involved in the study, three sets of twins and one set of triplets have discovered one another. One or two sets of twins may still not know they have an identical twin.

Three Identical Strangers

Three Identical Strangers is a 2018 documentary film, directed by Tim Wardle, about the lives of Edward Galland, David Kellman, and Robert Shafran, a

Three Identical Strangers is a 2018 documentary film, directed by Tim Wardle, about the lives of Edward Galland, David Kellman, and Robert Shafran, a set of identical-triplet brothers adopted as infants by separate families. Combining archival footage, re-enacted scenes, and present-day interviews, it recounts how the brothers discovered one another by chance in New York in 1980 at age 19, their public and private lives in the years that followed, and their eventual discovery that their adoption had been part of an undisclosed scientific "nature versus nurture" study of the development of genetically identical siblings raised in differing socioeconomic circumstances.

The film premiered at the 2018 Sundance Film Festival, where it won the U.S. Documentary Special Jury Award for Storytelling...

Identical (film)

Identical is an American independent thriller film directed by Daniel Bollag and Seo Mutarevic and starring Jonathan Togo, Emily Baldoni, Danny Alexander

Identical is an American independent thriller film directed by Daniel Bollag and Seo Mutarevic and starring Jonathan Togo, Emily Baldoni, Danny Alexander, Ed Asner, and Bern Cohen. The film is inspired by true events and is based on Daniel Bollag's novel *Memoirs of a Murder*. The film premiered on July 23, 2011 at the Symphony Space in New York City. The film concentrates on tragic relationship between two identical twins who are intent on killing each other.

Identical-machines scheduling

Identical-machines scheduling is an optimization problem in computer science and operations research. We are given n jobs J_1, J_2, \dots, J_n of varying processing

Identical-machines scheduling is an optimization problem in computer science and operations research. We are given n jobs J_1, J_2, \dots, J_n of varying processing times, which need to be scheduled on m identical machines, such that a certain objective function is optimized, for example, the makespan is minimized.

Identical machine scheduling is a special case of uniform machine scheduling, which is itself a special case of optimal job scheduling. In the general case, the processing time of each job may be different on different machines; in the case of identical machine scheduling, the processing time of each job is the same on each machine. Therefore, identical machine scheduling is equivalent to multiway number partitioning. A special case of identical machine scheduling is single-machine scheduling...

Identical (Turow novel)

Identical, published in 2013, is a novel by Scott Turow which details the complicated relationship between the Kronon and the Gianis families, who are

Identical, published in 2013, is a novel by Scott Turow which details the complicated relationship between the Kronon and the Gianis families, who are neighbors, friends, enemies, and rivals at different times throughout. Cass Gianis is sent to prison for the murder of Dita Kronon, his girlfriend; later Paul Gianis, Cass's identical twin brother, is running for mayor and Hal Kronon, Dita's older brother, uses his wealth to attempt to derail his campaign by accusing him of participating in Dita's murder.

Independent and identically distributed random variables

and statistics, a collection of random variables is independent and identically distributed (i.i.d., iid, or IID) if each random variable has the same

In probability theory and statistics, a collection of random variables is independent and identically distributed (i.i.d., iid, or IID) if each random variable has the same probability distribution as the others and all are mutually independent. IID was first defined in statistics and finds application in many fields, such as data mining and signal processing.

Identical ancestors point

In genetic genealogy, the identical ancestors point (IAP), also known as the all common ancestors (ACA) point, or genetic isopoint, is the most recent

In genetic genealogy, the identical ancestors point (IAP), also known as the all common ancestors (ACA) point, or genetic isopoint, is the most recent point in a given population's past such that each individual alive at that point either has no living descendants, or is the ancestor of every individual alive in the present. This point lies further in the past than the population's most recent common ancestor (MRCA).

Twin

monozygotic ('identical'), meaning that they develop from one zygote, which splits and forms two embryos, or dizygotic ('non-identical' or 'fraternal'), meaning that each twin develops from a separate egg and each egg is fertilized by its own sperm cell. Since identical twins develop from one zygote, they will share the same sex, while fraternal twins may or may not. In very rare cases, fraternal or (semi-) identical twins can have the same mother and different fathers (heteropaternal superfecundation).

Twins are two offspring produced by the same pregnancy. Twins can be either monozygotic ('identical'), meaning that they develop from one zygote, which splits and forms two embryos, or dizygotic ('non-identical' or 'fraternal'), meaning that each twin develops from a separate egg and each egg is fertilized by its own sperm cell. Since identical twins develop from one zygote, they will share the same sex, while fraternal twins may or may not. In very rare cases, fraternal or (semi-) identical twins can have the same mother and different fathers (heteropaternal superfecundation).

In contrast, a fetus that develops alone in the womb (the much more common case in humans) is called a singleton, and the general term for one offspring of a multiple birth is a multiple. Unrelated look-alikes whose...
