Unicity

Amalgamation of Winnipeg

The amalgamation of Winnipeg, Manitoba (also known as Unicity) was the municipal incorporation of the old City of Winnipeg, eleven surrounding municipalities

The amalgamation of Winnipeg, Manitoba (also known as Unicity) was the municipal incorporation of the old City of Winnipeg, eleven surrounding municipalities, and the Metropolitan Corporation of Greater Winnipeg (Metro) into one.

The amalgamated city's boundaries were established by the 1971 City of Winnipeg Act, combining the former Winnipeg and Metro with the rural municipalities of Charleswood, Fort Garry, North Kildonan, and Old Kildonan; the Town of Tuxedo; and the cities of East Kildonan, West Kildonan, St. Vital, Transcona, St. Boniface, and St. James-Assiniboia. The city-metropolitan government officially replaced the existing municipal governments on 1 January 1972.

Though officially joined in 1972, these areas and their respective civic services (e.g. police departments) were not...

Newark, Delaware

Newark (/?nju???rk/ NEW-ark) is a city in New Castle County, Delaware, United States. It is located 12 miles (19 km) west-southwest of Wilmington. According

Newark (NEW-ark) is a city in New Castle County, Delaware, United States. It is located 12 miles (19 km) west-southwest of Wilmington. According to the 2010 census, the population of the city is 31,454. The University of Delaware is located here. The city constitutes part of the Delaware Valley, and the Philadelphia metropolitan area.

Unicity (data analysis)

Instead, unicity is usually estimated using sampling techniques. Specifically, given a data set D {\displaystyle D} , the estimated unicity is computed

Unicity (

?

p

{\displaystyle \varepsilon _{p}}

) is a risk metric for measuring the re-identifiability of high-dimensional anonymous data. First introduced in 2013, unicity is measured by the number of points p needed to uniquely identify an individual in a data set. The fewer points needed, the more unique the traces are and the easier they would be to re-identify using outside information.

In a high-dimensional, human behavioural data set, such as mobile phone meta-data, for each person, there exists potentially thousands of different records. In the case of mobile phone meta-data, credit card transaction histories and many other types of personal data, this information includes the time and location...

Unicity distance

Roughly speaking, this is the L that makes KM/N=1. This L is the unicity distance. The unicity distance can equivalently be defined as the minimum amount of

In cryptography, unicity distance is the length of an original ciphertext needed to break the cipher by reducing the number of possible spurious keys to zero in a brute force attack. That is, after trying every possible key, there should be just one decipherment that makes sense, i.e. expected amount of ciphertext needed to determine the key completely, assuming the underlying message has redundancy.

Claude Shannon defined the unicity distance in his 1949 paper "Communication Theory of Secrecy Systems".

Consider an attack on the ciphertext string "WNAIW" encrypted using a Vigenère cipher with a five letter key. Conceivably, this string could be deciphered into any other string—RIVER and WATER are both possibilities for certain keys. This is a general rule of cryptanalysis: with no additional...

Unicity Mall

Unicity Shopping Centre (Formerly Unicity Mall) is a shopping centre in Winnipeg, Manitoba. It is officially classified as a big-box centre. The location

Unicity Shopping Centre (Formerly Unicity Mall) is a shopping centre in Winnipeg, Manitoba. It is officially classified as a big-box centre. The location was originally the site of Unicity Mall, which was an enclosed shopping mall. It was named for the 1972 unicity restructuring of city management.

Originally known as Unicity Fashion Square when it opened in September 1975, the mall was anchored by a Woolco and The Bay, and was one of only three malls in the city, along with Polo Park and Grant Park Shopping Centre. Managed by Trizec Corporation, the mall initially prospered despite one wing being almost completely empty. The food court McDonald's was the first to be placed inside a mall in western Canada. The Mall was demolished in 2000 to make way for the current shopping centre.

BC UNICS

BC UNICS (Russian: ?? ?????) is a professional basketball club in Kazan, Russia, that plays in the VTB United League, and formerly played in the EuroLeague

BC UNICS (Russian: ?? ?????) is a professional basketball club in Kazan, Russia, that plays in the VTB United League, and formerly played in the EuroLeague. On February 28, 2022, EuroLeague Basketball suspended the team because of the 2022 Russian invasion of Ukraine.

Their home arena is Basket-Hall Kazan.

Unicity (disambiguation)

Unicity refers to various things. As a city-zoning and city unification term, unicity may refer to: A section of the city of Winnipeg, Manitoba The unification

Unicity refers to various things.

As a city-zoning and city unification term, unicity may refer to:

A section of the city of Winnipeg, Manitoba

The unification of the City of Cape Town's local government

The 1971 City of Winnipeg Act, which is often called unicity.

Unicity is a European city in which students from Turkish and German schools co-create in the Cospaces environment within the eTwinning project in 2018.

Unic

Unic was a French manufacturer founded in 1905, and active as an automobile producer until July 1938. After this the company continued to produce commercial

Unic was a French manufacturer founded in 1905, and active as an automobile producer until July 1938. After this the company continued to produce commercial vehicles, retaining its independence for a further fourteen years before being purchased in 1952 by Henri Pigozzi, who was keen to develop Unic as a commercial vehicle arm of the then flourishing Simca business.

Unicity (philosophy)

The principle of unicity explains that each event, each living being, each object, each person or each circumstance has the characteristic of its uniqueness

The principle of unicity explains that each event, each living being, each object, each person or each circumstance has the characteristic of its uniqueness, of its particularity. Other similar events, living beings, objects, persons or circumstances may exist, but never the same entity.

The theory of quantum mechanics (QM) suggests that the principle of unicity is invalid. In other words, no physical system, physical process, or object has a unique and complete description. Instead, QM, the most successfully tested and proven theoretical framework, stipulates that all physical reality can be described in multiple

alternative, incompatible ways, using independent descriptions that cannot be contrasted, compared, or combined.

The principle of unicity implies that every conceivable property of...

Unics

Unics or UnICS may refer to: Unix, originally Unics, computer operating system software BC UNICS, a Russian basketball club This disambiguation page lists

Unics or UnICS may refer to:

Unix, originally Unics, computer operating system software
