The Microvision (aka Milton Bradley Microvision or MB Microvision) is the first handheld game console that used interchangeable cartridges and in that sense is reprogrammable. It was released by the Milton Bradley Company in November 1979 for a retail price of \$49.99, equivalent to \$221.00 in 2025.

The Microvision was designed by Jay Smith, the engineer who later designed the Vectrex video game console. The Microvision's combination of portability and a cartridge-based system led to moderate success, with Smith Engineering grossing \$15 million in the first year of the system's release. However, its small game library, its small screen, and a lack of support from established home video game companies led to its discontinuation in 1981. According to Satoru Okada, the former head of Nintendo's...

The Milton-Bradley Company is a historic former factory complex at Park, Cross, and Willow Streets in Springfield, Massachusetts. The factory was built beginning in about 1880, and expanded over the next decades to include a variety of brick multi-story buildings that are relatively utilitarian in appearance. When built, the property belonged to George Tapley, a principal in the Taylor and Tapley Manufacturing Company and a childhood friend of Milton Bradley. Bradley had entered the toy business in the 1860s, and moved his company to Tapley's premises in 1882.

The success of his eponymous company led to a significant expansion of the premises, which eventually came to occupy an entire city block. The facilities were used in all aspects of toy and game manufacturing, including a lithographic...
