A sphere (from Greek ?????, *sphaîra*) is a surface analogous to the circle, a curve. In solid geometry, a sphere is the set of points that are all at the same distance r from a given point in three-dimensional space. That given point is the center of the sphere, and the distance r is the sphere's radius. The earliest known mentions of spheres appear in the work of the ancient Greek mathematicians.

The sphere is a fundamental surface in many fields of mathematics. Spheres and nearly-spherical shapes also appear in nature and industry. Bubbles such as soap bubbles take a spherical shape in equilibrium. The Earth is often approximated as a sphere in geography, and the celestial sphere is an important concept in astronomy. The S2 8.0 A is an American trailerable sailboat that was designed by Arthur Edmunds and Leon Slikkers as a cruiser and first built in 1974. The designation indicates the approximate length overall in meters.

The S2 8.0 A was the first of three 8.0-designated designs that all use the same hull, but different decks. The 8.0 A was replaced by the S2 8.0 B in 1976, which has a longer cabin coach house. The 1975 S2 8.0 C model has a center cockpit. The 8.0 A was initially marketed as the "8.0 Sloop" and was later known as the 8.0 A to avoid confusion with the later models that replaced it in production.
