Appetite is the desire to eat food items, usually due to hunger. Appealing foods can stimulate appetite even when hunger is absent, although appetite can be greatly reduced by satiety. Appetite exists in all higher life-forms, and serves to regulate adequate energy intake to maintain metabolic needs. It is regulated by a close interplay between the digestive tract, adipose tissue and the brain. Appetite has a relationship with every individual's behavior. Appetitive behaviour also known as approach behaviour, and consummatory behaviour, are the only processes that involve energy intake, whereas all other behaviours affect the release of energy. When stressed, appetite levels may increase and result in an increase of food intake. Decreased desire to eat is termed anorexia, while polyphagia...

An orexigenic, or appetite stimulant, is a drug, hormone, or compound that increases appetite and may induce hyperphagia. This can be a medication or a naturally occurring neuropeptide hormone, such as ghrelin, orexin or neuropeptide Y, which increases hunger and therefore enhances food consumption. Usually appetite enhancement is considered an undesirable side effect of certain drugs as it leads to unwanted weight gain, but sometimes it can be beneficial and a drug may be prescribed solely for this purpose, especially when the patient is suffering from severe appetite loss or muscle wasting due to cystic fibrosis, anorexia, old age, cancer or AIDS. There are several widely used drugs which can cause a boost in appetite, including tricyclic antidepressants (TCAs), tetracyclic antidepressants...

Adler's Appetite, was an American rock band from Los Angeles, formed in 2003. Along with original material, the band performs covers of drummer and namesake Steven Adler's former band Guns N' Roses, primarily songs from the album Appetite for Destruction.

Former Slash's Snakepit guitarist Keri Kelli first formed the band in 2003, with the original lineup consisting of Adler, Faster Pussycat guitarist Brent Muscat, former Ratt bassist Robbie Crane as well as then-Ratt singer Jizzy Pearl, also formerly of Love/Hate. The band toured the US and Europe, with a number of musicians filling in for band members due to touring commitments. Following the departure of Muscat in 2004, they recorded and released the Adler's Appetite EP in January 2005. The same year, Adler announced a new lineup of the band...

Specific appetite, also known as specific hunger, is a drive to eat foods with specific flavors or other characteristics.

Regulation of homeostasis is essential to the survival of animals. Because the nutritional content of a diet will vary with environmental and other conditions, it is useful for animals to have a mechanism to ensure that their nutritional needs are within the appropriate range. Specific appetite is one such mechanism. Specific appetite has been demonstrated in various species for a number of vitamins and minerals, as well as calories, protein, and water. Unfortunately, specific appetite is very difficult to study experimentally, as there are a number of factors that influence food choice. Very little is known about the specific mechanisms inducing specific appetite, and the...
