## **What Does it Mean to be Human? Life, Death, Personhood and the Transhumanist Movement**

This book is a critical examination of the philosophical and moral issues in relation to human enhancement and the various related medical developments that are now rapidly moving from the laboratory into the clinical realm. In the book, the author critically examines technologies such as genetic engineering, neural implants, pharmacologic enhancement, and cryonic suspension from transhumanist and bioconservative positions, focusing primarily on moral issues and what it means to be a human in a setting where technological interventions sometimes impact strongly on our humanity. The author also introduces the notion that death is a process rather than an event, as well as identifies philosophical and clinical limitations in the contemporary determination of brain death as a precursor to organ procurement for transplantation. The discussion on what exactly it means to be dead is later applied to explore philosophical and clinical issues germane to the cryonics movement. Written by a physician/ scientist and heavily referenced to the peer-reviewed medical and scientific literature, the book is aimed at advanced students and academics but should be readable by any intelligent reader willing to carry out some side-reading. No prior knowledge of moral philosophy is assumed, as the various key approaches to moral philosophy are outlined early in the book.

## **Death's Social and Material Meaning beyond the Human**

Death studies typically focus on the death of humans, overlooking the wider factors involved in social and natural processes around death. This edited volume provides an alternative focus for death studies by looking beyond human death, to reveal the complex interconnections among human and more than human creatures, entities and environments. Bringing together a diverse range of international scholars, the book sheds light on topics which have previously remained at the margins of contemporary death studies and death care cultures. Organised around three themes – Knowledge and Mediation, Care and Remembrance, and Agency and Power – this book pushes the boundaries of death studies to explore death and dying from beyond the perspective of a nature/culture binary.

## **The Eclectic review. vol. 1-New [8th]**

This is the extended and annotated edition including \* an extensive biographical annotation about the author and his life St. Chrysostom's Commentary on the Epistle to the Romans in one of the closest and most argumentative of those he has left us. The style of the Epistle itself called for this, being such as almost constantly to remind an attentive reader of the necessity of forming some notion of the views and feelings of the persons to whom it was originally addressed. To this point St. Chrysostom has paid much attention, and has consequently obtained a far clearer view of the doctrinal bearing of the Epistle than most other commentators. His early rhetorical education would probably have given him even to strong a bias toward that kind of exposition, but for his subsequent course of severe discipline and ascetic devotion. As it is, the rhetorical element in his commentary is of very great value. His ready apprehension of the effect intended to be produced by the style and wording of a sentence, is often the means of clearing up what might otherwise seem obscure or even inconsistent. An example of this occurs in the beginning of the seventh chapter, which he expounds in the 12th Homily. The illustration of our release from the Law of Moses by partaking in the Death of Christ, by the dissolution of marriage at death, is so stated in the Epistle as to contain an apparent inconsistency, as though the death of the Law, and the death of the person, were confounded. And the various readings only shift the difficulty, without removing it. This, however, he has very ably shown to be, in fact, an argument a priori. Other cases will strike other persons as they happen to have found difficulty in the Text.

For nearly fifteen years Practical Decision Making in Health Care Ethics has offered scholars and students a highly accessible and teachable alternative to the dominant principle-based theories in the field. Devettere’s approach is not based on an ethics of abstract obligations and duties, but, following Aristotle, on how to live a fulfilled and happy life—in short, an ethics of personal well-being grounded in prudence, the virtue of ethical decision making. This third edition is revised and updated and includes discussions of several landmark cases, including the tragic stories of Terri Schiavo and Jesse Gelsinger (the first death caused by genetic research). Devettere addresses new topics such as partial-birth abortion law, embryonic stem cell research, infant euthanasia in The Netherlands, recent Vatican statements on feeding tubes, organ donation after cardiac death, new developments in artificial hearts, clinical trials developed by pharmaceutical companies to market new drugs, ghostwritten scientific articles published in major medical journals, and controversial HIV/AIDS research in Africa. This edition also includes a new chapter on the latest social and political issues in American health care. Devettere’s engaging text relies on commonsense moral concepts and avoids academic jargon. It includes a glossary of legal, medical, and ethical terms; an index of cases; and thoroughly updated bibliographic essays at the end of each chapter that offer resources for further reading. It is a true classic, brilliantly conceived and executed, and is now even more valuable to undergraduates and graduate students, medical students, health care professionals, hospital ethics committees and institutional review boards, and general readers interested in philosophy, medicine, and the rapidly changing field of health care ethics.

What is contemplation? How is it distinct from meditation? Is contemplation essentially religious or mystical? What should one contemplate, and how? Are there different styles of contemplation, and why should one practice them? Ought we try to lead more contemplative lives? This book offers a philosophical introduction to the theory and practice of contemplation. Kevin Hart examines a variety of religious, aesthetic, and philosophical notions, shedding light on the singular qualities of contemplation. This book spans topics including the spiritual exercises of the ancient Greeks, overlooked aspects of Christian spirituality, and aesthetic contemplation of nature and art. Contemplation ranges from ancient thinkers such as Aristotle, Plato, and Plotinus to Aquinas and other medieval theologians as well as modern philosophers like Kant, Husserl, and Wittgenstein. Though focused on Christianity, it also considers contemplation in other religious traditions, among them Buddhism, Hinduism, Judaism, Islam, and Paganism. Concise and comprehensive, this book provides both religious and nonreligious readers with a foundational understanding of the history and nature of contemplation as well as the benefits of practicing it.

Jüngel sets out to establish a basis for a theology of God the crucified while avoiding the shoals of theism and atheism. He warns of the danger, rooted in the fact that modernity no longer dares to think God, of talking God to death, of silencing God with too much God-talk. Jüngel analyzes what our possibilities are of thinking and speaking God and concludes that theology has to become the narrative of God's humanity. This second book in the series helps the reader to gain a more explicit awareness of the contemporary issues Jüngel's theology grapples with.
