Recovered-memory therapy

they had previously believed to be recovered through RMT upon encountering critical literature regarding recovered memory therapy. This literature often

Recovered-memory therapy (RMT) is a catch-all term for a controversial and scientifically discredited form of psychotherapy that critics say utilizes one or more unproven therapeutic techniques (such as some forms of psychoanalysis, hypnosis, journaling, past life regression, guided imagery, and the use of sodium amytal interviews) to purportedly help patients recall previously forgotten memories. Proponents of recovered memory therapy claim, contrary to evidence, that traumatic memories can be buried in the subconscious and thereby affect current behavior, and that these memories can be recovered through the use of RMT techniques. RMT is not recommended by professional mental health associations. RMT can result in patients developing false memories of sexual abuse from their childhood and...

Recovered Territories

inhabitants of the Recovered Territories had to be removed quickly to house Poles displaced by the Soviet annexation, the Recovered Territories initially

The Recovered Territories or Regained Lands (Polish: Ziemia Odzyskana), also known as the Western Borderlands (Polish: Kresy Zachodnie), and previously as the Western and Northern Territories (Polish: Ziemia Zachodnie i Północne), Postulated Territories (Polish: Ziemia Postulowana) and Returning Territories (Polish: Ziemia Powracająca), are the former eastern territories of Germany and the Free City of Danzig that became part of Poland after World War II, at which time most of their German inhabitants were forcibly deported.

The rationale for the term "Recovered" was that these territories formed part of the Polish state, and were lost by Poland in different periods over the centuries. It also referred to the Piast Concept that these territories were part of the traditional Polish homeland...

"Never Recover" is a song by American rappers Lil Baby and Gunna with Canadian rapper Drake. The track was released on October 5, 2018, as the final track on the former two's collaborative album, Drip Harder.

Recovered: Journeys Through the Autism Spectrum and Back

receiving intervention at an early age recover completely." Recovered was self-distributed through its website. Recovered won Best Documentary in the 2008 Director's

Recovered: Journeys Through the Autism Spectrum and Back is a 2008 documentary directed by Michele Jaquis and co-produced by psychologist Doreen Granpeesheh and her business, the Center for Autism and Related Disorders (CARD). The film focuses on four children that Granpeesheh and other CARD staff claim fully "recovered" from autism and co-occurring intellectual disability after receiving intensive, longterm applied behavior analysis (ABA). Recovered premiered on April 25, 2008, at the Pacific Design Center's SilverScreen Theater.

Recovering the Satellites

Recovering the Satellites is the second studio album by American alternative rock band Counting Crows. It was released in the United States on October

Recovering the Satellites is the second studio album by American alternative rock band Counting Crows. It was released in the United States on October 15, 1996, three years after their debut album and following two years of worldwide touring. With producer Gil Norton, it features founding members Adam Duritz, David Bryson (guitar), Charlie Gillingham (keyboards), and Matt Malley (bass), as well as new additions Ben Mize (drums) and Dan Vickrey (guitars). Multi-instrumentalist and eventual band member David Immerglück played on the album as a session musician, as well.

Three singles were released, with "A Long December" being the best charting, peaking at number 6 on the US Radio Songs chart and number 1 in Canada.

The album reached No. 1 on the Billboard Hot 200 album chart in the US, No. 4...

USNS Range Recoverer

USNS Range Recoverer (T-AG-161/T-AGM-2/YFRT-524) was a missile range instrumentation ship responsible for providing radar and/or telemetry track data

USNS Range Recoverer (T-AG-161/T-AGM-2/YFRT-524) was a missile range instrumentation ship responsible for providing radar and/or telemetry track data on missiles launched from American launch sites.

She was built during World War II as U.S. Army U.S. Army FS-278, and was acquired by the U.S. Navy in 1960 as miscellaneous auxiliary and was converted into a missile tracking ship. She continued her missile tracking until being placed out of service in 1972, at which time she was reclassified range tender YFRT-524, and eventually sold for scrap in 1974. However, she avoided the scrapyards and served as a fishing vessel until at least 2016.

Recover (command)

systems. Typing recover at the DOS command-line invoked the program file RECOVER.COM or RECOVER.EXE (depending on the DOS version). recover proceeded under

In computing, recover is a primitive file system error recovery utility included in MS-DOS / IBM PC DOS versions prior to DOS 6.0 and a number of other operating systems.
