Elixir is a functional, concurrent, high-level general-purpose programming language that runs on the BEAM virtual machine, which is also used to implement the Erlang programming language. Elixir builds on top of Erlang and shares the same abstractions for building distributed, fault-tolerant applications. Elixir also provides tooling and an extensible design. The latter is supported by compile-time metaprogramming with macros and polymorphism via protocols.

The community organizes yearly events in the United States, Europe, and Japan, as well as minor local events and conferences.

Flash Boys: A Wall Street Revolt is a book by the American writer Michael Lewis, published by W. W. Norton & Company on March 31, 2014. The book is a non-fiction investigation into the phenomenon of high-frequency trading (HFT) in the US financial market, with the author interviewing and collecting the experiences of several individuals working on Wall Street. Lewis concludes that HFT is used as a method to front run orders placed by investors. He goes further to suggest that broad technological changes and unethical trading practices have transformed the U.S. stock market from "the world's most public, most democratic, financial market" into a "rigged" market.

FastCode is an open source programming project that aims to provide optimized runtime library routines for Embarcadero Delphi and C++ Builder. This community-driven project was started in 2003 by Dennis Kjaer Christensen and has since contributed optimized functionality to the 32-bit Delphi runtime library (RTL).

Organized as a competition divided into challenges, FastCode focuses on optimizing specific functions against multiple targets. The project offers benchmarking tools and validation processes for each function contribution. Contributions are scored, with points awarded based on performance against the targets. Embarcadero recognizes and incorporates the code created by the FastCode team into their Delphi codebase. Most participants in this project are assembler developers who utilize...
