## New York Regents Examinations

*Science Teacher: New York State (NYS) Regents Preparation The Physical Setting/Earth Science – #1 Earth Science Regents Review Website JMAP – Regents*

In New York State, Regents Examinations are statewide standardized examinations in core high school subjects. Students were required to pass these exams to earn a Regents Diploma. To graduate, students are required to have earned appropriate credits in a number of specific subjects by passing year-long or half-year courses, after which they must pass at least five examinations. For higher-achieving students, a Regents with Advanced designation and an Honors designation are also offered. There are also local diploma options. Passing the exams will no longer be a condition of graduation beginning in the 2027-28 school year.

The Regents Examinations are developed and administered by the New York State Education Department (NYSED) under the authority of the Board of Regents of the University of...

## Bronx High School of Science

*college science courses. Over 100 unique courses are offered. All New York State Regents classes are offered, with the exception of earth science. In the*

The Bronx High School of Science is a public specialized high school in the Bronx in New York City. It is operated by the New York City Department of Education. Admission to Bronx Science involves passing the Specialized High Schools Admissions Test.

Founded in 1938 in the Bronx, Bronx Science is located in what is now Kingsbridge Heights, also known as Jerome Park, a neighborhood in the northwest portion of the Bronx. Although originally known for its focus on mathematics and science, Bronx Science also emphasizes the humanities and social sciences.

The Bronx High School of Science is often called Bronx Science, Bronx Sci, BX Sci, and sometimes just Science. It was formerly called Science High, and its founder, Morris Meister, is said to have frequently called the school "The High School of...

## Department of Earth Sciences, University of Oxford

*The Department of Earth Sciences is the Earth Sciences department of the University of Oxford, England, which is part of the university's Mathematical*

The Department of Earth Sciences is the Earth Sciences department of the University of Oxford, England, which is part of the university's Mathematical, Physical and Life Sciences Division. The department is based in the Earth Sciences building on South Parks Road in the Science Area.

## Susan Kilham

*1971. Retrieved 23 July 2022. "The University of Michigan Regents Communication" (PDF). Regents of the University of Michigan. June 1, 2022. Retrieved 23*

Susan Soltau Kilham (1943–2022) was an American aquatic ecologist. She made notable contributions to phycology and to ecological stoichiometry, and much of her research focused on diatoms. Kilham has also been described as a particularly prolific and impactful scientific mentor. She served on the faculty of the University of Michigan from the early 1970s until the early 1990s, and then moved to Drexel University,

where she was a professor in the Department of Biodiversity, Earth and Environmental Science, as well as chairing that department and serving on the faculty senate. Kilham received the Psychological Society of America Career Achievement Award, and is the namesake of a professorship at the University of Michigan.

## Education in Kansas

*colleges and universities are supervised by the Kansas Board of Regents. The Kansas Board of Regents governs or supervises thirty-seven public institutions. It*

Education in Kansas is governed at the primary and secondary school level by the Kansas State Board of Education. The state's public colleges and universities are supervised by the Kansas Board of Regents.

## Oceanography

*physics, chemistry, biology, and geology. It is an Earth science, which covers a wide range of topics, including ocean currents, waves, and geophysical*

Oceanography (from Ancient Greek ?????? (?keanós) 'ocean' and ????? (graph?) 'writing'), also known as oceanology, sea science, ocean science, and marine science, is the scientific study of the ocean, including its physics, chemistry, biology, and geology.

It is an Earth science, which covers a wide range of topics, including ocean currents, waves, and geophysical fluid dynamics; fluxes of various chemical substances and physical properties within the ocean and across its boundaries; ecosystem dynamics; and plate tectonics and seabed geology.

Oceanographers draw upon a wide range of disciplines to deepen their understanding of the world's oceans, incorporating insights from astronomy, biology, chemistry, geography, geology, hydrology, meteorology and physics.

## Pelham Memorial High School

*greater depth with those topics which are included. All eighth grade students take Physical Setting: Earth Science, and take the regents as their final exam*

The Pelham Memorial High School is the only high school within the town of Pelham Town, New York, United States. It is part of the Pelham Union Free School District.

The district (of which this is the sole comprehensive high school) includes Pelham Town, which has Pelham Village and Pelham Manor Village. As of 1997 a small portion of land that is between Pelham and Pelham Bay Park, with a total of 35 houses, is a part of the Bronx, but is cut off from the rest of the borough due to the way the county boundaries were established. The New York City government pays for the residents' children to go to Pelham Union Free School District schools, including Pelham Memorial High School, since that is more cost effective than sending school buses to take the students to New York City Department of Education...

## Astrology and science

*confusion over terminology. List of topics characterized as pseudoscience Religion and science Western esotericism and science Gauquelin attributed this phenomenon*

Astrology consists of a number of belief systems that hold that there is a relationship between astronomical phenomena and events or descriptions of personality in the human world. Astrology has been rejected by the scientific community as having no explanatory power for describing the universe. Scientific testing has found no evidence to support the premises or purported effects outlined in astrological traditions.

Where astrology has made falsifiable predictions, it has been falsified. The most famous test was headed by Shawn Carlson and included a committee of scientists and a committee of astrologers. It led to the conclusion that natal astrology performed no better than chance.

Astrology has not demonstrated its effectiveness in controlled studies and has no scientific validity, and is...

### Winter's King

*and explores topics such as the effects on humans of space travel at nearly the speed of light, as well as religious and political topics such as feudalism*

"Winter's King" is a science fiction short story by American writer Ursula K. Le Guin, originally published in the September 1969 issue of *Orbit*, a fiction anthology. The story is part of the Hainish Cycle and explores topics such as the effects on humans of space travel at nearly the speed of light, as well as religious and political topics such as feudalism.

"Winter's King" was one of four nominees for the 1970 Hugo Award for Best Short Story.

Le Guin revised the story, mainly editing the gendered language and pronouns, for its inclusion in her 1975 short story collection *The Wind's Twelve Quarters*.

### Outline of futures studies

*Center for Futures Studies*; "Master of Science in Foresight"; Stanford Center for Foresight and Innovation; Regent University: School of Global Leadership

The following outline is provided as an overview of and topical guide to futures studies:

Futures studies (also called futurology) – study of postulating possible, probable, and preferable futures and the worldviews and myths that underlie them. There is a debate as to whether this discipline is an art or science. In general, it can be considered as a branch of the social sciences and parallel to the field of history. History studies the past, futures studies considers the future. Futurology (colloquially called "futures" by many of the field's practitioners) seeks to understand what is likely to continue and what could plausibly change. Part of the discipline thus seeks a systematic and pattern-based understanding of past and present, and to determine the likelihood of future events and trends...
