What Is BPM

Business process management

Business process management (BPM) is the discipline in which people use various methods to discover, model, analyze, measure, improve, optimize, and automate

Business process management (BPM) is the discipline in which people use various methods to discover, model, analyze, measure, improve, optimize, and automate business processes. Any combination of methods used to manage a company's business processes is BPM. Processes can be structured and repeatable or unstructured and variable. Though not required, enabling technologies are often used with BPM.

As an approach, BPM sees processes as important assets of an organization that must be understood, managed, and developed to announce and deliver value-added products and services to clients or customers. This approach closely resembles other total quality management or continual improvement process methodologies.

ISO 9000:2015 promotes the process approach to managing an organization.

BPM (Beats per Minute)

BPM (Beats per Minute), also known as 120 BPM (Beats per Minute), (French: 120 battements par minute) is a 2017 French drama film directed by Robin Campillo

BPM (Beats per Minute), also known as 120 BPM (Beats per Minute), (French: 120 battements par minute) is a 2017 French drama film directed by Robin Campillo and starring Nahuel Pérez Biscayart, Arnaud Valois and Adèle Haenel. The film is about the AIDS activism of ACT UP Paris in 1990s France. Campillo and co-screenwriter Philippe Mangeot drew on their personal experiences with ACT UP in developing the story.

It had its world premiere at the 2017 Cannes Film Festival, followed by screenings at other festivals. At Cannes it won critical acclaim and four awards, including the Grand Prix. It went on to win six César Awards, including Best Film, and other honours.

Subject-oriented business process management

Subject-oriented business process management (S-BPM) is a communication based view on actors (the subjects), which compose a business process orchestration

Subject-oriented business process management (S-BPM) is a communication based view on actors (the subjects), which compose a business process orchestration or choreography. The modeling paradigm uses five symbols to model any process and allows direct transformation into executable form.

Each business process consists of two or more subjects which exchange messages. Each subject has an internal behavior (capsulation), which is defined as a control flow between different states, which are receive and send message and do something. For practical usage and for syntactical sugaring there are more elements available, but not necessary.

In 2011 and 2012 S-BPM has been included in Gartner's Hype Cycle.

1987 (What the Fuck Is Going On?)

BPM)" – 6:00 "Mind the Gap" [unlisted sample of ambient noise in a London Underground station] – 1:02 "Don't Take Five (Take What You Want) (89 BPM)" –

1987 (What the Fuck Is Going On?) is the debut studio album by British electronic band the Justified Ancients of Mu Mu (the JAMs), later known as the KLF. 1987 was produced using extensive unauthorised samples that plagiarised a wide range of musical works, continuing a theme begun in the JAMs' debut single, "All You Need Is Love". These samples provided a deliberately provocative backdrop for beatbox rhythms and cryptic, political raps.

Shortly after independent release in June 1987, the JAMs were ordered by the Mechanical-Copyright Protection Society to destroy all unsold copies of the album, following a complaint from ABBA. In response, the JAMs disposed of many copies of 1987 in unorthodox, publicised ways. They also released a version of the album titled 1987 (The JAMs 45 Edits), stripped...

Social business process management

Process Reengineering Process improvement "What is Business Process Management? An In-Depth BPM Guide". "Is Social BPM A Methodology, A Technology, Or Just

Social BPM is a discipline which combines traditional Business Process Management techniques with Web 2.0 "social" tools and technologies, to facilitate business improvement efforts.

There is debate about whether Social BPM is a methodology, a set of technologies, or just a buzzword. Forrester Research's Clay Richardson defines Social BPM to include:

A methodology

Social Networking principles

A combination of Web 2.0 and social tools with BPM to enable bi-directional collaboration

Guess What (song)

"Syleena Johnson

Guess What". Genius. Brown, Jamie Foster (2003). Sister 2 Sister: S 2 S. (14th ed.). p. 276. "Key & BPM for Guess What by Syleena Johnson" - "Guess What" is a song by American recording artist Syleena Johnson from her second studio album, Chapter 2: The Voice. Written and produced by R. Kelly, the song was released as the album's second single on August 20, 2002. It became Johnson's first number-one single as a lead artist in the US, peaking at number one on the Adult R&B Songs chart and staying there for four non-consecutive weeks.

An accompanying music video was directed by Fab Five Freddy. The video depicts Johnson's conflict with her unfaithful lover. A remix entitled "Guess What (Guess Again)" was released as a single and featured R. Kelly's vocals as well as production and writing.

So What (Pink song)

tempo of "So What" is 126 BPM (beats per minute), although it may also be interpreted at half-time (at 63 BPM) or double-time (at 252 BPM). Additionally

"So What" is a song recorded by American singer Pink for her fifth studio album, Funhouse (2008). The song was written by Pink, Max Martin, and Shellback, and produced by Martin. Selected as the album's lead single, "So What" was first released on August 11, 2008, and to mainstream radios on August 25, 2008, through LaFace and Zomba Label Group. The song consists of a martial beat and synth backing. The lyrics

are based on her separation from freestyle motocross rider Carey Hart, which occurred six months prior to the release.

"So What" received positive reviews from contemporary music critics; many praised it for its aggressive and empowering nature while others deemed it childish and bratty. The song was also successful commercially, topping the charts in several countries across Europe and...

WAT (album)

BPM) "Ende" (Laibach/Turk/Umek) – 3:45 (127 BPM) "Now You Will Pay" (Laibach/Turk) – 6:07 (125 BPM) "Hell: Symmetry" (Laibach/Turk) – 5:02 (115 BPM)

WAT is the sixth studio album by Slovenian music group Laibach, released September 8, 2003.

The CD included a bonus video of "Tanz mit Laibach" and the vinyl LP and promo CD "Reject or Breed".

The album title is an acronym for "We Are Time" as the title track reveals.

"The point of WAT is not what Laibach is, or what it wants, but what you are and where you stand".

Business performance management

performance management (BPM) (also known as corporate performance management (CPM) enterprise performance management (EPM),) is a management approach which

Business performance management (BPM) (also known as corporate performance management (CPM) enterprise performance management (EPM),) is a management approach which encompasses a set of processes and analytical tools to ensure that a business organization's activities and output are aligned with its goals. BPM is associated with business process management, a larger framework managing organizational processes.

It aims to measure and optimize the overall performance of an organization, specific departments, individual employees, or processes to manage particular tasks. Performance standards are set by senior leadership and task owners which may include expectations for job duties, timely feedback and coaching, evaluating employee performance and behavior against desired outcomes, and implementing...

Border Personnel Meeting Point

BPM Flag Meeting is a meeting between the armies "used to resolve local issues like patrols inadvertently crossing over and prevents flare-ups". BPM points

Border Personnel Meeting points are locations along the disputed Sino-Indian territories on Line of Actual Control (LAC) where the armies of both countries hold ceremonial and practical meetings to resolve border issues and improve relations. While border meetings have been held since the 1990s, the first formal Border Personnel Meeting point was established in 2013. There are five meeting points: two in the Indian Union Territory of Ladakh, one in Sikkim, and two in Arunachal Pradesh in India's Central and Eastern sectors.

India has identified the specific Patrol Points with the specified route and the maximum depth up to which Indian troops usually patrol into the disputed territory on LAC. Patrolling points provide a truer sense of the extent of India's limits of actual control.
