Cubic foot

The cubic foot (symbol ft3 or cu ft) is an imperial and US customary (non-metric) unit of volume, used in the United States and the United Kingdom. It

The cubic foot (symbol ft3 or cu ft) is an imperial and US customary (non-metric) unit of volume, used in the United States and the United Kingdom. It is defined as the volume of a cube with sides of one foot (0.3048 m) in length, or exactly 28.316846592 L, which is very close to ¹⁄35 of a cubic metre).

2007 FT3

2007 FT3 (also written 2007 FT3) is a lost asteroid with a short observation arc of 1.2 days that cannot be recovered with targeted observations and awaits

2007 FT3 (also written 2007 FT3) is a lost asteroid with a short observation arc of 1.2 days that cannot be recovered with targeted observations and awaits serendipitous survey observations. It has a poorly constrained orbit and has not been seen since 2007. It was first observed on 20 March 2007 when the asteroid was estimated to be 0.19 ± 0.01 AU (28.4 ± 1.5 million km) from Earth and had a solar elongation of 107 degrees. 2007 FT3 is the fourth largest asteroid with better than a 1-in-2 million cumulative chance of impacting Earth after (29075) 1950 DA, 1979 XB, and 101955 Bennu. With a cumulative Palermo Technical Impact Hazard Scale of -2.63, the poorly known orbit and assumed size place 2007 FT3 third on an unconstrained listing of the Sentry Risk Table.

Malaysia Federal Route 3

border with Thailand) in Kelantan until Johor Bahru in Johor. The entire FT3 highway is gazetted as a part of the Asian Highway Network route 18. The

Federal Route 3 is a main federal road running along the east coast of Peninsula Malaysia. The 739 kilometres (459 mi) federal highway connects Rantau Panjang (near the border with Thailand) in Kelantan until Johor Bahru in Johor. The entire FT3 highway is gazetted as a part of the Asian Highway Network route 18.

The Federal Route 3 has gained a reputation as one of the best coastal highways in Malaysia and Asia due to the scenic views along the highway, as being recognised by the National Geographic Society and Harian

Metro. The Federal Route 3 is named as one of the top 10 coastal highways in Asia by the National Geographic Society, while Harian Metro recognises the FT3 highway as one of the best highways in Malaysia.

Jerangau–Jabor Highway

Pahang. The highway runs in parallel with the Federal Route 3

while the FT3 highway is a coastal highway, the Jerangau–Jabor Highway FT14 runs through - Jerangau–Jabor Highway, Federal Route 14 (Malay: Lebuhraya Jerangau–Jabor) is a 179.63-km federal highway running from the city of Kuala Terengganu, Terengganu, Malaysia to Kuantan, Pahang. The highway runs in parallel with the Federal Route 3 - while the FT3 highway is a coastal highway, the Jerangau–Jabor Highway FT14 runs through the interior area instead. Although the distance from Kuala Terengganu to Kuantan via both FT3 and FT14 highways are about the same (about 200 km), the Jerangau–Jabor Highway FT14 significantly shortens the travelling time due to fewer towns being passed. Therefore, the Jerangau–Jabor Highway FT14 became the main route from Pahang to Terengganu before the advent of the East Coast Expressway Phase 2 E8.

Socket FT3

AMD's Socket FT3 or BGA-769 targets mobile devices and was designed for APUs codenamed Kabini and Temash, Beema and Mullins (Socket FT3b). "Kabini" and

AMD's Socket FT3 or BGA-769 targets mobile devices and was designed for APUs codenamed Kabini and Temash, Beema and Mullins (Socket FT3b).

"Kabini"- and "Temash"-branded products combine Jaguar with Islands (GCN), UVD 3 and VCE 2.0 video acceleration and AMD Eyefinity-based multi-monitor support of maximum two monitors.

"Beema"- and "Mullins"-branded products combine Puma with AMD Radeon Rx 200 Series (GCN), UVD 3 and VCE 2.0 video acceleration and AMD Eyefinity-based multi-monitor support of maximum two monitors.

Its desktop counterpart is Socket AM1.

Žunovo Water Sports Centre

to 777 ft³/s). The right channel is 460 meters long, with a 1.4% slope of 14 m/km (76 ft/mile) and a streamflow of 7 to 12 m³/s (247 to 424 ft³/s). When

The Žunovo Water Sports Centre is an artificial whitewater slalom course in Slovakia, on an island in the Danube river, 14 km southeast of Bratislava, near the village of Žunovo. It is powered by flow diversion from the Žunovo dam. Since 1997, it has hosted a full schedule of local, regional, and international competitions, including multiple World Cup races, 2 European Championships and the 2011 World Championships.

Chaika gas field

80 billion ft³ (2.3 km³). It will begin production of natural gas and condensates in 2018, with a production rate of around 40 million ft³/day (0,56 million m³)

The Chaika gas field is a natural gas field located on the continental shelf of the Black Sea, offshore of Bulgaria in the Galata block. Discovered in 2013, it was developed by PetroCeltic, determining it to have initial total proven reserves of around 80 billion ft³ (2.3 km³). It will begin production of natural gas and condensates in 2018, with a production rate of around 40 million ft³/day (0,56 million m³).

Androscoggin River

ranged from 16,500 to 0 ft³/s (467 and 0 m³/s) (zero flow when dam closed). The mean annual flow between 1905 and 2005 is 1,919 ft³/s (54.3 m³/s). The second

The Androscoggin River (Abenaki: Ammosconggon) is a river in the U.S. states of Maine and New Hampshire, in northern New England. It is 178 miles (286 km) long and joins the Kennebec River at Merrymeeting Bay in Maine before its water empties into the Gulf of Maine on the Atlantic Ocean. Its drainage basin is 3,530 square miles (9,100 km²) in area. The name "Androscoggin" comes from the Eastern Abenaki term Ammosconggon, which referred to the entire portion of the river north of the Great Falls in Lewiston, Maine. The Anglicization of the Abenaki term is likely an analogical contamination with the colonial governor Edmund Andros.

Farakka Feeder Canal

flow of water in the feeder canal is reduced from ca. 40,000 ft³/s to 30,000-28,000 ft³/s. If the severe drought brings down the Ganges water from its

Feeder Canal is a canal associated with Farakka Barrage. It is located in Murshidabad district, West Bengal. The canal is 38.3 km (26 miles) long. The Ganges water from the Farakka Dam is being conveyed to Bhagirathi by way of this canal. Due to the flow of river Hooghly through the Farakka dam project, around 40,000 ft³/s of water is available daily in the Feeder connection. The Feeder canal has been designed keeping in mind the ability to carry this amount of water. However, during the dry season, less water is released. The dry season is from January to May. During the period the flow of water in the feeder canal is reduced from ca. 40,000 ft³/s to 30,000-28,000 ft³/s. If the severe drought brings down the Ganges water from its upper reaches, then less water is available in feeder canal...
