

4 As A Mixed Number

Mixed-sex sports

Mixed-sex sports (also known as coed sports) are individual and team sports whose participants are not of a single sex. In many organised sports settings

Mixed-sex sports (also known as coed sports) are individual and team sports whose participants are not of a single sex. In many organised sports settings, rules dictate an equal number of people of each sex in a team (for example teams of one man and one woman). Usually, the main purpose of these rules are to account for physiological sex differences. Mixed-sex sports in informal settings are typically groups of neighbours, friends or family playing without regard to the sex of the participants. Mixed-sex play is also common in youth sports as before puberty and adolescence, sport-relevant sex differences affect performance far less.

There are multiple dynamics to mixed-sex sports teams. Where sex differences in human physiology do not play a significant role in a person's proficiency in a...

Mixed radix

measuring time; a time of 32 weeks, 5 days, 7 hours, 45 minutes, 15 seconds, and 500 milliseconds might be expressed as a number of minutes in mixed-radix notation

Mixed radix numeral systems are non-standard positional numeral systems in which the numerical base varies from position to position. Such numerical representation applies when a quantity is expressed using a sequence of units that are each a multiple of the next smaller one, but not by the same factor. Such units are common for instance in measuring time; a time of 32 weeks, 5 days, 7 hours, 45 minutes, 15 seconds, and 500 milliseconds might be expressed as a number of minutes in mixed-radix notation as:

... 32, 5, 07, 45; 15, 500

... ?, 7, 24, 60; 60, 1000

or as

32?5707244560.15605001000

In the tabular format, the digits are written above their base, and a semicolon indicates the radix point. In numeral format, each digit has its associated base attached as a subscript, and the radix...

Mixed electoral system

A mixed electoral system is one that uses different electoral systems to elect different seats in a legislature. Most often, this involves a First Past

A mixed electoral system is one that uses different electoral systems to elect different seats in a legislature. Most often, this involves a First Past the Post combined with a proportional component. The results of the combination may be mixed-member proportional (MMP), where the overall results of the elections are proportional, or mixed-member majoritarian, in which case the overall results are semi-proportional, retaining disproportionalities from the majoritarian component. Systems that use multiple types of combinations are sometimes called supermixed.

Mixed-member systems also often combine local representation (most often single-member constituencies) with regional or national (multi-member constituencies) representation, having multiple tiers. This also means voters often elect different...

Mixed-member proportional representation

Mixed-member proportional representation (MMP or MMPR) is a type of representation provided by some mixed electoral systems which combine local winner-take-all

Mixed-member proportional representation (MMP or MMPR) is a type of representation provided by some mixed electoral systems which combine local winner-take-all elections with a compensatory tier with party lists, in a way that produces proportional representation overall. Like proportional representation, MMP is not a single system, but a principle and goal of several similar systems. Some systems designed to achieve proportionality are still called mixed-member proportional, even if they generally fall short of full proportionality. In this case, they provide semi-proportional representation.

In typical MMP systems, voters get two votes: one to decide the representative for their single-seat constituency, and one for a political party, but some countries use single vote variants. Seats in...

Mixed economy

A mixed economy is an economic system that includes both elements associated with capitalism, such as private businesses, and with socialism, such as

A mixed economy is an economic system that includes both elements associated with capitalism, such as private businesses, and with socialism, such as nationalized government services.

More specifically, a mixed economy may be variously defined as an economic system blending elements of a market economy with elements of a planned economy, markets with state interventionism, or private enterprise with public enterprise. Common to all mixed economies is a combination of free-market principles and principles of socialism.

While there is no single definition of a mixed economy, one definition is about a mixture of markets with state interventionism, referring specifically to a capitalist market economy with strong regulatory oversight and extensive interventions into markets. Another is that of...

Mixed brigade

system; as a result, the mixed brigade scheme was counterproductive and worked to the detriment of the Republican military capacity. Origins of the mixed brigade

Mixed brigade (Spanish: brigada mixta) was a basic tactical military unit of the Republican army during the Spanish Civil War. It was initially designed as "pocket division", an innovative maneuverable combined-arms formation. Because of high saturation with specialized troops and services it would have resembled a division, but in terms of manpower it would have been much smaller and amount to some 3,700 men.

Shortages of career officers and NCOs plus inability to provide arms and equipment needed rendered the original mixed brigade pattern unworkable. The Republican general staff kept redrafting the scheme with decreasing proportion of non-infantry sub-units, though even these arrangements proved impossible to implement. Most of the 188 mixed brigades raised during the war were closer to...

Swimming at the 2016 Summer Paralympics – Mixed 4 × 50 metre freestyle relay 20pts

The mixed 4 × 50 freestyle relay

20 points swimming events for the 2016 Summer Paralympics took place at the Rio Olympic Stadium on 9 September 2016 - The mixed 4 × 50 freestyle relay - 20 points swimming events for the 2016 Summer Paralympics took place at the Rio Olympic Stadium on 9 September 2016.

2014 IPC Swimming European Championships – Mixed 4 × 50 metre freestyle relay

The Mixed 50 metre x 4 freestyle at the 2014 IPC Swimming European Championships was held at the Pieter van den Hoogenband Swimming Stadium, in Eindhoven

The Mixed 50 metre x 4 freestyle at the 2014 IPC Swimming European Championships was held at the Pieter van den Hoogenband Swimming Stadium, in Eindhoven from 4–10 August.

As with other disability relay events, the freestyle works on a points system whereby the classification numbers of each swimmer are totaled to give a number no higher than 20. This was the first time the European Championships have included a mixed sex event, which required each team to be made up of two male and two female competitors.

Mixed (United Kingdom ethnicity category)

The Mixed or Multiple ethnic group numbered just under 1.8 million in the 2021 United Kingdom census or 2.7% of the total UK population. A number of academics

Mixed is an ethnic group category that was first introduced by the United Kingdom's Office for National Statistics for the 2001 Census. Colloquially, it refers to British citizens or residents whose parents are of two or more races or ethnic backgrounds. The Mixed or Multiple ethnic group numbered just under 1.8 million in the 2021 United Kingdom census or 2.7% of the total UK population.

Mixed language

A mixed language, also referred to as a hybrid language or fusion language, is a type of contact language that arises among a bilingual group combining

A mixed language, also referred to as a hybrid language or fusion language, is a type of contact language that arises among a bilingual group combining aspects of two or more languages but not clearly deriving primarily from any single language. It differs from a creole or pidgin language in that, whereas creoles/pidgins arise where speakers of many languages acquire a common language, a mixed language typically arises in a population that is fluent in both of the source languages.

Because all languages show some degree of mixing by virtue of containing loanwords, it is a matter of controversy whether the concept of a mixed language can meaningfully be distinguished from the type of contact and borrowing seen in all languages. Scholars debate to what extent language mixture can be distinguished...
