## Why Johnny Can't Write

The authors of this book, both experienced teachers, examine the controversy surrounding two popular methods for teaching writing -- the "process" approach and its offspring, *Writing Across the Curriculum*. Both have recently been called into question for their ineffectiveness. An alternative lesser-known procedure called "sentence combining," which has been proven successful in numerous studies over the past fifteen years, finally is gaining the attention it deserves. Using the sentence combining approach, the authors present a rationale for re-thinking and re-tooling the English classroom and consequently making the entire educational system work more effectively. This book is useful for teachers at any level, especially those involved in writing instruction. It is also worthwhile reading for those wishing to improve their writing skills. Doing the sample exercises will strengthen writing skills and provide a solid foundation for a lifelong program of language growth.

Cultural differences play a part in communication breakdowns between students and teachers, and only a complete understanding of the model that English instructors use when teaching writing gives us an insight into the reasons why. This book observes and analyzes the communication patterns of Latino students in an English course at the college level, closely observing the interaction between Latino students and the teacher, as well as between Latino students and other student groups in the class. *Learning to Write as a Hostile Act for Latino Students* concludes that cultural differences - and the resulting miscommunications - significantly contribute to the negative impressions Latino students have about the writing process and English courses. Understanding these differences is crucial to improving the teaching of writing to Latino and other minority students.

How To Write Anything: The Format Of What You Write May Change But The Process Of Writing Anything Remains The Same This book is called *How To Write Anything*, and I confess there is some ego involved in the title. But then I've been a professional writer for over 40 years. As one of Canada's most successful writers and authors, I have written hard news articles, soft news and feature articles, advertising

and promotional copy, media releases, reports and proposals, case studies, research papers, email messages, website content, tweets, blog posts, and other online content. I have also written over 20 books on business, promotional and online writing and other topics, such as writing articles, memoir writing and living with Multiple Sclerosis, a disease that I have, but one that has not prevented me from writing or training. I've also written a collection of short stories, poetry, and a couple of plays. So while I haven't written everything, I've written many things. The fact is that you can't read this book and go forth and write anything if you are not familiar with the format or structure of the document that you want to write--be it non-fiction or fiction. For instance, if you want to write a report, you do so using the methods in this book. However, you have to know how to structure reports. The same is applicable to email, social media content, articles, promotional content, case studies, reports, white papers, PowerPoint presentations, speeches, website content, short stories or novels. So some of you reading this book might still have some learning to do. However, I suspect most of you know the structure of the documents you want to produce and you will be able to immediately apply the methods outlined in the book to writing any document that you need to write.

## **How To Write Anything: The Format Of What You Write May Change But The Process Of Writing Anything Remains The Same**

Everybody has something to say. In an age when Twitter, blogs, and Tumblrs give millions the chance to write whatever is on their minds, it seems that we're finding plenty of avenues in which to share it. How, then, do we write what is worth saying? How do we record our important memories so they'll be remembered? How do we tell our personal stories the way they deserve to be told? In keeping with successful earlier editions of *Writing from Within*, Selling has stressed the idea that personal writing is a means to personal understanding. Learning to write well starts with the subjects we know the best—ourselves. To write life stories, writers explore vivid memories and re-engage with the perspectives of their younger selves. They learn to harness their inner critics and deal with fear. They use their creative drive to remember details from their most significant memories. The process of life story writing is as much one of self-discovery as it is one of nostalgia. These emotional connections to memories provide the backbone for Selling's writing instruction. In this 25th anniversary edition of *Writing from Within*, the original lessons of life story writing are included and significantly expanded upon. Readers are given guidance on finding their earliest memories and on remembering details vividly. Writing instruction is offered to accompany this process and ensure that readers' life stories are full of clear, accurate memories. The core focus of the book is on unlocking memories and writing them as life stories. However, this Anniversary edition also provides substantial new material on: Story pacing techniques Strategies for subtly adding exposition and denouement Revealing and unraveling character Writing stories within stories Developing unique voices within the same story Researching and writing family histories Expanding life story writing into novels or screenplays Advanced steps like creating visual motifs, employing sub-text, and separating the writer from the central character Draft samples will show readers how their life stories will grow using the *Writing from Within* method. Excerpts from past students' life stories show the potential of the method. Personal notes to readers keep them on track and their goals in perspective. *Writing from Within: The Next Generation* invites readers to find their voices and helps them along the way to doing so. As much a tool for personal reflection as a guide to writing instruction, the

book represents a comprehensive discussion of the creative process. Writers, new and old, will write with more skill, understand themselves and their characters better, and be able to turn their life experiences into art. So, learn to harness your inner critic. Construct your own writing process. Open the door to your past. Give the characters voices. Breathe some life into your story and leave something so future generations can get to know you.

Between 1916 and 1918, Lance-Corporal George Timmins, a British-born soldier who served in the Canadian Expeditionary Force, wrote faithfully to his wife, May, and three children back home in Oshawa. Sixty-three letters and four fragments survived. These letters tell the compelling story of a man who, while helping his fellow Canadians make history at Vimy, Lens, Passchendaele, and Amiens, used letters home to remain a presence in the lives of his wife and children, and who drew strength from his family to appreciate life's simple pleasures, when they were afforded. Transcribed and annotated by Y.A. Bennett, Timmins's letters offer a rare glimpse into the experiences and relationships, at home and abroad, of a Canadian infantryman. Its story of quiet heroism and the brotherhood of the trenches will appeal to anyone interested in how ordinary soldiers experienced and survived the First World War.

Analyzes interviews with students, teachers, and administrators to develop a new set of literacies essential for student success in the digital age. To read John's work is to take on the role of a patient listener. A book, like a piece of music, is scored for time, and I feel *Time to Write* is scored adagio. I believe that *Time to Write* can be read as a critique of [the] time-chopping approach to education and an argument for presence, for being fully open to experience, for being there. To do good work, we must enter something like island time or what John calls existential time or what is sometimes called flow when we lose, at least temporarily, a sense of clock time. from the Foreword by Thomas Newkirk Twenty-five years ago, John Sylvester Lofty studied the influence of cultural time values on students' resistance to writing instruction in an isolated Maine fishing community. For the new edition of *Time to Write*, Lofty returned to the island to consider how social and educational developments in the intervening years may have affected both local culture and attitudes toward education. Lofty discovered how the island time values that previously informed students' literacy learning have been transformed by outside influences, including technology, social media, and the influx of new residents from urban areas. Building on the ethnographic findings of the original study, the new edition analyzes the current conflict between the digital age time values of constant connections and instant communication, and those of school-based literacy. Lofty examines the new literacies now essential for students in a technologically connected world, both those who aspire to continue the traditional island work of lobster fishing, and for the many who now choose to pursue other careers and attend college on the mainland.

This book addresses the validity of think-aloud protocols (TAPs) in L2 writing research through a mixed methods study and proposes effective approaches for their valid implementation. The book uncovers the reactive effects that TAPs have on L2 writing performance and processes, and examines how individual factors moderate this reactivity. It further presents and categorizes participants' perceptions regarding reactivity and veridicality. To enhance veridicality, the book identifies incomplete TAPs using retrospective verbal reports as a reference point. Recommendations for utilizing TAPs include considering participants' individual differences, recent experiences, and emotions. This book will be valuable to educators teaching methodology in second or foreign language education, applied linguistics, or writing research, and to L2 researchers or graduate students with a broad interest in research methods, process-based research, or writing studies, or planning to incorporate TAPs into their research.
